

## 'Wildcat' Chutists Hold Men

American, Brazil Airmen Inspecting Crash, Being Held By Group In Jungle

RIO DE JANEIRO (AP)—The U. S. Embassy said today it has received assurance from the Brazilian government that necessary steps are being taken to effect the release of a U. S. civilian aviation inspector and a Brazilian Air Force major held captive by a "wildcat" group of parachutists.

The embassy was informed the Brazilian Air Force was sending three planes to the Brazilian jungle area where a search for the wreckage of a Pan-American Stratocruiser had taken an entirely unlooked for turn of events.

In Miami, Fla., Gordon Bennett, chief advisor for the Miami International District offices of the CAA, said 30 or more armed parachutists were holding Scott A. Magness, CAA aviation safety advisor from Miami, and Maj. Miranda Correa of the Brazilian Air Force.

He said they were being used as hostages in an attempt to gain transportation for the parachutists back to civilization from a helicopter landing strip 3.7 miles from the spot where a Pan American World Airways plane crashed April 29, killing 50 persons, including 10 Americans.

The pilot of a U. S. helicopter messaged his commanding officer at Albrook Air Force Base in the Panama Canal zone that he had removed all U. S. government officials from the jungle "except one (Magness) who is being held hostage by Brazilian parachutists."

He said he was forced to fly supplies to the armed group at the threat of death to Magness. Bennett said the unauthorized expedition, led by Lino de Mattos, a deputy from the state of Sao Paulo, had been sponsored and financed by Adhemar de Barros, a former governor of Sao Paulo and mentioned as a possible candidate for President of Brazil in the next election.

No further information was available here, but it was known that there was conflict between the official expedition to the scene of the crash and the volunteer group, which was called a "solidarity caravan."

The crash scene is 591 miles south-southeast of Belem and 933 miles north of Rio de Janeiro. The plane was en route from Buenos Aires to New York when it crashed.

Final rites for the victims were held at the scene yesterday. Because of the difficulty of removal from the terrain and condition of the bodies, officials ordered immediate burial.

**Wage Agreement Halts Lederle Picket Siege**

PEARL RIVER, N. Y. (AP)—A compromise wage agreement today brought an end to a picket-line siege at the Lederle Laboratories, where an airlift was used to feed self-imprisoned plant workers and research animals.

Automobiles and employees started moving in and out of the plant through token picket lines only a few minutes after Federal Mediator Thomas G. Daugherty announced the settlement.

The strike started Wednesday and on Thursday the company reported picket line disorders.

Since then, no one had gone through the picket lines, and two small planes were used to take food supplies to the 400 humans and half million animals in the plant.

The 400-acre Lederle establishment is the world's only producer of the wonder drug aureomycin. Those camped inside the plant maintained research tests into such diseases as cancer, polio, and tuberculosis.

Daugherty said an 8-cent-an-hour across the board wage increase had been reached at an all-night, 14-hour bargaining session between representatives of the company and the AFL Chemical Workers Union.

**The Weather**

Partly cloudy tonight and Tuesday. Little warmer Tuesday. Low tonight near 50. High Tuesday in the 70s.

The temperature at 7 a. m. was 46 degrees above zero; 62 at 1 p. m., and 64 at 2 p. m.

Lake of Ozarks: 4.5; rise 1.

• Thought for Today

No man or woman of the humblest sort can really be strong, gentle, pure, and good without the world being the better for it, without somebody being helped and comforted by the very existence of that goodness. — Phillips Brooks.

## Youth Wedged In Crevasse of Ice 8,000 Feet Up on Mt. St. Helens

SPIRIT LAKE, Wash. (AP)—A mountain silence cloaked a desperate effort today for the rescue of a University of Washington student from a crevasse 8,000 feet up the icy slopes of Mt. St. Helens.

The youth wedged between two walls of solid ice was Art Jessett, 20-year-old son of the Rev. and Mrs. Thomas E. Jessett of Seattle.

He was lost through the snow "bridge" across the crevasse Sunday while trailing three companions on a descent from the 8,671-

foot peak. They believed he was about 90 feet down.

Hopes for his survival between the icy walls dwindled with each passing hour.

An experienced mountaineer party started out before dawn from Spirit Lake, near the mountain base. The peak is about 50 miles south of Mt. Ranier and about the same distance northeast of Portland, Ore.

Indications were that it would take several hours for news of

tragedy or success to come from the mountain. It was a several hours' hike from the scene and a 45-mile drive to the nearest telephone.

The last contact with the trapped youth was late Sunday.

Jessett called to his companions that he was trapped in the narrow ice hole about 35 feet down. He said he thought he had broken his arm. Then as the ice about him melted from the heat of his body he called out that he was slipping.

The party's only rope went with him. It was looped about Jessett's shoulder.

Mountaineers from Seattle and Portland were called to base camp here at 4 a. m. to aid in the rescue attempt. State patrolmen and members of the Mt. St. Helens ski patrol labored until nightfall yesterday.

Bruce Ray, Seattle, a member of Jessett's party, said Jessett was about 300 feet behind the group when he disappeared.

When they returned to look for him, they found only a hole about the size of a man in the snow. Ray said the crevasse had been covered completely by the snow.

Ray said Jessett called, "I'm slipping."

While Ray skied down the mountain for help, another member of the party, Ford Oliphant, 20, of Chehalis, intercepted six other climbers on the mountain and borrowed a rope.

Oliphant was lowered into the ice hole as the others braced the rope with ice axes.

Oliphant said he found an ice ledge about 60 feet below the rim of the hole where he was able to stand. He said the hole was about the size of his body.

"But as I stood there, the heat from my body melted the ice and I kept slipping," he said.

Oliphant said he heard two groans from about 30 feet below him—then silence.

He said the walls of the crevasse were of solid ice from 10 feet below the surface. It was terribly cold.

After Oliphant was drawn exhausted back to the surface he sobbed:

"If we could have gotten him out we would."

## Late News Bulletins

**House Passes Bill For Soil Conservation**

WASHINGTON (AP)—The House today passed and sent to President Truman a bill extending the Soil Conservation program for two more years. The program of payment to farmers for conservation practices would have expired at the end of this year.

The soil conservation law was first enacted in 1936. It has been extended, generally for 2-year periods, periodically since then.

**Challenge McGranery's Fitness to Be Atty-Gen.**

WASHINGTON (AP)—Two Republican senators today challenged the fitness of James P. McGranery to be attorney general. They said his integrity, ability and veracity are "most equitable."

Senators Ferguson of Michigan and Watkins of Utah filed a minority report disagreeing sharply with the majority vote for confirmation in the Senate Judiciary Committee.

**Reject Social Security Benefits Boost Today**

WASHINGTON (AP)—Legislation to boost Social Security benefits at a cost of 300 million dollars a year was rejected today by the house.

The vote was 149 for the measure and 140 against it. However, the bill was brought up under a parliamentary situation which barred amendments and required a two-thirds majority for passage.

**Mike Salmon Wins Lions' Marble Title**

Cub Scout Mike Salmon won the 1952 Cub Scout Marble Tournament by the Sedalia Lions' Club Sunday in a grand one-two finish at the playgrounds of Broadway School.

Mike, after earning his way into the final tournament by representing Den 2 of Pack 56 (East Sedalia Baptist Church), finished the competition by cleaning the last two marbles in the ring to win over Gary Holderman, Den 5 of Pack 67 (Horace Mann PTA), with the score 11-7-6.

Marbles and prizes were awarded by the Lions' Club to every boy who represented a Den in the final competition. Other Cub Scouts in the final contest were:

Pack 67 — Horace Mann PTA—Tommy Brown, David McMullen, Steven Eisert, A. J. Heck, Tommy Leslie, Gary Siron and Adam Fisher.

Pack 56 — East Sedalia Baptist Church — David Baughers, Danny Seaman and Alvin Schultz.

Pack 63 — Jefferson PTA — Jerry Lawson, Ron Whitehead and Norman Botcher.

Pack 65 — Broadway Presbyterian Church — Jack Benner and Eddie Arquist.

**Western Union Strike Talks Are Resumed**

WASHINGTON (AP)—Peace talks between the Western Union Telegraph Co. and striking telegraph workers continued today with some indications of progress toward ending the semi-official French Press Agency (AFP).

The editorial staff members quit work for 24 hours earlier yesterday to push their demand for a 5.65 per cent pay raise. The government promptly served them with a writ of habeas corpus and threatened arrest and fines unless work is resumed.

The newsmen said their demands had not been met but their union advised the return to work.

**Sinclair Reaches Agreement on Oil Worker Increases**

DENVER (AP)—A wage agreement involving 10,000 striking refinery workers of the Sinclair Oil Corp. was announced today at headquarters of the CIO Oil Workers International Union.

The union said the agreement now is being signed in New York and the men presumably will return to work within a few hours.

The vote by more than 30 Sinclair locals showed 58 per cent favoring the agreement.

It covers workers in six refineries with a daily output of 315,000 barrels as well as company's crude oil production and pipelines.

Union officials said the Sinclair agreement, the only one negotiated on a nation-wide basis, would go a long way toward bringing a speedy end to the 20-day strike.

Earlier, they estimated about 6,000 of the almost 90,000 union workers who walked out April 30 were returning to their jobs by today.

The Sinclair vote was on a 15-cent hourly wage boost and increased night shift differentials.

Meantime, attention turned to California, which supplies the major portion of petroleum products used in the Korean War. The state has been exempted from the strike to ensure supplies for Korea.

An estimated 3,000 CIO workers at Shell Oil Company plants in California were to vote today on a package 15-cent hourly pay boost plus increased shift differentials, which union officials claim, would amount to 21 cents an hour.

Settlements reached over the weekend included an agreement in the big Port Arthur, Tex., oil center reached between Atlantic Refining and 350 strikers.

Other agreements all approximately at or near the 15-cent figure, were reached at Texas Company refineries at Lockport and Lawrenceville, Ill.; Pure Oil Company's Toledo, Ohio, and Charleston and Dawes, W. Va., plants; Standard's Wood River, Ill., refinery; and the Augusta, Kan., refinery of Socony-Vacuum.

**French Press Strike Broken by Threats**

PARIS (AP)—Government threats of arrest and fines last night broke a one-day strike by employees of the semi-official French Press Agency (AFP).

The editorial staff members quit work for 24 hours earlier yesterday to push their demand for a 5.65 per cent pay raise. The government promptly served them with a writ of habeas corpus and threatened arrest and fines unless work is resumed.

The newsmen said their demands had not been met but their union advised the return to work.

**Price Controls Off Cotton and Textiles**

WASHINGTON (AP)—Office of Price Stabilization said today price controls are being suspended on raw cotton and practically all textiles including those made of wool, cotton and synthetic fibers.

OPS officials said Price Stabilization officials signed the order this morning. Details are to be announced late today.

## British Leaving China

Businessmen Will Dispose of Large Holdings and Quit. They Tell Peiping

LONDON (AP)—Britain told Red China today remaining British businessmen in China have decided to close down or dispose of their 300 million pound (840 million dollar) investment and quit the country.

In a note delivered in Peiping, Britain also asked the Chinese Communist government to grant exit visas for an estimated 120 Britons, who would leave the country as soon as their businesses are wound up.

The note said the decision to give up any further attempt to continue in business in China was made by the business firms concerned.

A Foreign Office spokesman said Britain's one-sided recognition of the Peiping regime would continue.

Britain, largely at the prodding of British business interests in China, recognized the Communist government in January, 1950. British business has been in dominant position in China for more than two centuries.

Full diplomatic relations never have been established. Britain has a charge d'affaires, L. H. Lamb, in Peiping. He has only limited access to Peiping foreign office officials, however. Communist China has not made any move to open a diplomatic mission in London.

"Our contacts with China, such as they are, will be maintained," a spokesman said.

Newspaper reports said British owners have tried to sell their property to Chinese Government agencies, but there was little optimism.

"The Foreign Office thinks the chances of the companies getting compensation for their abandoned property are very small," said the Daily Express.

The Communists ordered seizure of all American properties on the Chinese mainland at the end of 1950. No compensation was paid.

The Reds have seized outright only one British holding, however—the Asiatic Petroleum Company, in April, 1951. This was in retaliation for British seizure in Hong Kong of a tanker formerly owned by the Chinese Nationalist government and claimed by the Reds.

The properties the British are reported now planning to give up are located chiefly in Shanghai, Tientsin, Hankow, Canton and a sprinkling of smaller cities. Belonging to firms covering almost the entire field of commerce, they include factories, shipyards, warehouses, hotels and office buildings.

The firms include some of the greatest names in the history of trade in the Far East, among them the British-American Tobacco Company, the Shell Oil Company, and the Anglo-Siam Corporation.

Formerly 10,000 Britons ran the holdings in China. Now the scattered British colony totals only about 120 persons.

Getting them out may present keen diplomatic problems. Some Western businessmen have been held in the past by Chinese Red authorities until their employees were paid vast "settlement" sums by the Chinese themselves.

The Daily Express said the British government had been asked to step in and "help by safeguarding the interests of British employees."

The Express did not say how the news of the British departure already had been communicated to the Communists in a formal note handed to Chinese Premier and Foreign Minister Chou En-lai. A British Foreign Office spokesman said he had no confirmation of the report.

Britain, in a policy split with the United States, recognized the Chinese Communist government in January, 1950, and sent a charge d'affaires to Peiping. The Peiping regime, however, has ignored his presence and has sent no diplomatic representative to London in return. The reports today said Britain, however, would retain her diplomatic toe-hold in China.

Nor would British control of the island of Hong Kong be affected by the withdrawal from the mainland, the papers said.

**Grade Schools' Track Meet Tuesday at 1:30**

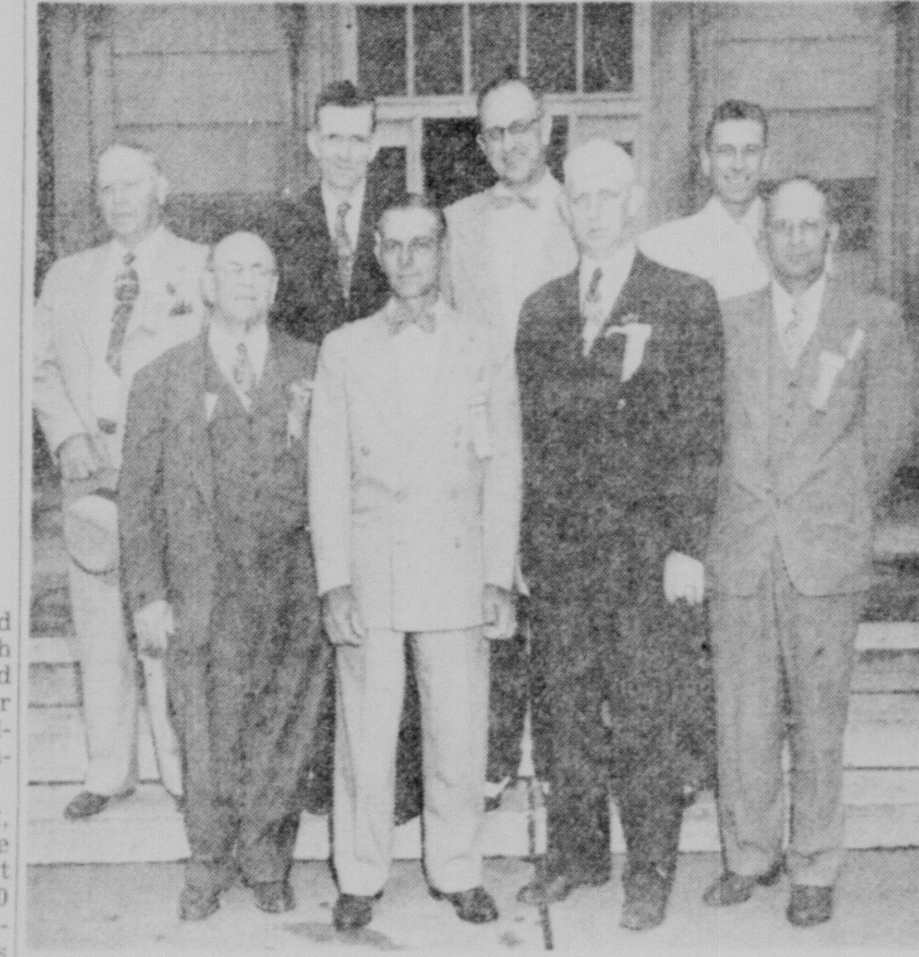

The Sedalia Grade Schools will hold their yearly track meet at the Smith-Cotton High School athletic field at 1:30 p. m. Tuesday.

All records are expected to be broken as the schools seem to be overflowing with talent. The events to be run are as follows: 25 yard dash, 50 yard dash, 100 yard shuttle relay, high jump, pole vault, broad jump, low hurdles and the shot put.

Washington is favored to win the meet in all classes, A, B and C. The classes are as follows: Class A—100 pounds or over; Class B—96 pounds to 100 pounds; Class C—85 pounds or below.

Coach Bob Kames and his track squad will officiate in the events, with the grade school coaches as judges.

A trophy will be awarded to the school winning the meet, and ribbons for boys who place in an event. The points will be scored: eight for first, five for second, three for third, two for fourth, and one for fifth.

NEW OFFICERS OF THE MISSOURI STATE COUNCIL OF CARPENTERS, elected here Saturday at the state convention, are, front row, left to right: Frank Fry, Local 1653, Kansas City, millman western district; Edwin Laux, Local 5, St. Louis, millman eastern district; Sam Curd, Local 1529, Kansas City, vice-president; Walter Huggert, Local 1262, Chillicothe, president. Back row, left to right: R. W. Greenwade, 978, Springfield, board member; H. P. McCarty, Local 1925, Columbia, board member; Mel Shassette, Local 417, St. Louis, secretary-treasurer. (Photo by Lehmer.)

## Father of 3 Sons Wants a Daughter

LONDON (AP)—A man among too many men appealed for help today in the personal column of the London Times. "Father of three sons desires a daughter," the advertisement read. "Can anyone send suggestions?"

## Truce Leader Calls Commie Denial a Lie

Declares Reds Had Agreed to Screening All War Prisoners

MUNSAN, Korea (AP)—The top United Nations truce negotiator today lashed as an "out-and-out" lie a Communist denial that the Reds had agreed to Allied screening of captured Reds.

Inside the Panmunjom conference tent, Vice Adm. C. Turner Joy, senior U.N. delegate, told the Reds:

"Had the results been to your liking you would have enthusiastically welcomed the product of the screening."

North Korean Gen. Nam Il replied:

"It is inconceivable and nobody would believe that our side who is firmly opposed to the retention of our captured personnel by your side under whatever name could have agreed directly or indirectly to you so-called screening."

A recent Allied quizzing of Red prisoners of war showed that nearly 100,000 North Koreans and Chinese prisoners were unwilling to return to communism.

The issue of exchanging prisoners blocks an armistice. In Tokyo, Gen. Mark Clark, U.N. supreme commander, announced that Maj. Gen. William K. Harrison Jr. will succeed Joy as senior U.N. truce delegate Friday.

Joy, only remaining member of the original five-man truce team which began the talks last July 10, will leave the Far East June 9 to become superintendent of the U. S. Naval Academy.

Harrison has been a member of the U.N. delegation since Jan. 23. Clark has not announced a replacement for Harrison.

The 37 minutes of bitter debate today produced no progress, but the truce delegations will meet again tomorrow at 11 a. m. (9 p. m. Monday, EST).

Joy did not use the word lie inside the conference tent. But he told newsmen Nam Il began "to lie and deny they ever agreed to the screening."

"That is an out-and-out lie," the gray-haired admiral said.

## Gen. Harrison Named To Play Joy's Role

TOKYO (AP)—Maj. Gen. William K. Harrison was named today to succeed Vice Adm. C. Turner Joy on Friday as chief of the United Nations Command Korean Armistice delegation.

Harrison, 56, a lay evangelist, has been a member of the Allied truce team since January.

The appointment of a two-star general, announced by Gen. Mark W. Clark, came as a surprise. It had been expected that an officer of Joy's three-star rank would be named to deal with the Communists at Panmunjom.

The 57-year-old Joy has guided the U.N. truce team since the armistice talks began July 10. He is the only remaining member of the original delegation.

Joy will depart June 9 for his new assignment as superintendent of the U. S. Naval Academy at Annapolis.

No successor as a delegation member was announced. Harrison has retained his position as deputy commanding general of the U. S. Eighth Army in Korea.

## No Court Ruling On Steel

Supreme Tribunal Recesses Without Giving a Decision On Seizure Case

WASHINGTON (AP)—The Supreme Court today recessed until next Monday without handing down a decision in the historic steel seizure case. The tribunal could announce a ruling before its next opinion day but whether it will do so is not known.

The court had no formal opinions today but did issue several routine orders.

The nine justices have had the case since arguments ended last Tuesday on whether U. S. District Judge David A. Pine ruled correctly in calling Presidential Truman's seizure of the steel mills "illegal and without authority of law."

But a major question before the court—whether the President has the inherent constitutional powers which the Justice Department claimed for him—is so complex that lawyers on both sides say a decision this soon would be surprising.

However, legal authorities here say that no matter how the court rules, it is not likely to issue a sweeping decision one way or the other on the question of the chief executive's inherent powers. These are powers not specifically set forth in the Constitution or the laws, and it was on these powers that Truman relied when he took over the steel mills to avert a strike.

The steelmakers asked the Supreme Court to uphold Judge Pine's decision, delivered April 29, and restore the mills to them.

The Justice Department, legal arm of the President, asked the court to overturn Pine's ruling and declare the seizure lawful. The Supreme Court has stayed the effect of Pine's decision until it resolves the issue. Thus the mills have remained in government hands.

The high court might:

1. Send the whole case back to District Court for full trial on the merits.

2. Decide that within the particular circumstances surrounding the steel seizure, the President either had no right to seize or did have the right.

Judge Pine's decision went further than a mere finding that the steel seizure was unlawful. His sweeping decision said the Constitution does not "grant the President expressly or impliedly" the inherent powers claimed for him by the Justice Department.

Both industry and union officials say there has been no attempt at negotiation of a new contract since May 11, when the last effort to work out a compromise failed at the White House.

They say there is small chance of any further settlement attempts until the Supreme Court announces its decision.

**Queen Asks Start On Figuring Her Salary In Office**

LONDON (AP)—Queen Elizabeth II asked Parliament today to start figuring out what wages it is going to pay her as ruler of the British realm.

She hinted she thinks her husband, the Duke of Edinburgh, ought to get a pay raise from his present £9,000 a year (\$28,000 a year). She also asked some financial provision for her younger sister, Princess Margaret, "in the event of her marrying."

Elizabeth's late father, King George VI, got 410,000 pounds (\$1,480,000) a year for himself and another 167,000 pounds (\$567,600) to support his family and relatives.

H. F. C. Crookshank, Conservative leader of the House of Commons, said the government would ask tomorrow for appointment of a committee to consider the Queen's message.

Elizabeth's request mentioned only her husband, their two children and Princess Margaret, but it is customary also to provide for the Queen Mother. For example, Queen Mary was voted 70,000 pounds (\$219,000) when King George V died in 1936. It is presumed Queen Mother Elizabeth will receive at least as much.

Elizabeth said she will need no money for Prince Charles, the heir apparent, because he already receives the income from the rich Duchy of Cornwall.

**Wasp Returning To Duty After Speedy Repairs**

BAYONNE, N. J. (AP)—The aircraft carrier Wasp, seaworthy after a rush repair job on her collision-mangled bow, returned to active duty today.

The 34,000-ton flattop left the naval shipyard here and headed for Gravesend Bay in New York to pick up stores and ammunition.

Repair work on the ripped bow was completed in 10 days. A 90-ton portion of the carrier's bow was grafted onto the Wasp, reducing repair time by weeks.

During night maneuvers in the Atlantic April 26, the Wasp knifed into the destroyer—minesweeper Hobson which went down with 176 of its men. Sixty-one Hobson crewmen were rescued.

# Alias Basil Willing

By Helen McCloy

THE STORY: Jack Duggan, a private detective, was ordered while masquerading under Basil Willing's name. The same night Miss Katherine Shaw, who apparently was to meet Duggan, died. Dr. Zimmer, who is a psychiatrist, is Basil Willing, had entered the room, saw the doctor, Dr. Zimmer, and her secretary, Charlotte Dean, and a number of other guests. Basil calls on Charlotte Dean and finds that Brinsley Shaw has planned to sell all of his aunt's things at auction. Basil asks Miss Dean if anything were found that would throw light on the case.

XIX  
CHARLOTTE DEAN closed her eyes a few moments. Then she opened them with a helpless expression. "I found nothing. Nothing at all."

"Miss Shaw was not only lame. She was blind. She couldn't write a letter or read one. She couldn't even dial a telephone by herself. How was it possible for her to get in touch with Duggan without anyone, even you, her daily companion, knowing anything about it?"

"I've been thinking about that. There's only one way it could have happened. Some friend must have recommended him to her casually and given her his telephone number. She could memorize that. Then, when I was out on one of my regular afternoon walks she could ask the maid to dial the number and send her out of the room while she talked. Mary wouldn't remember a number she had dialed after a week or so."

Basil nodded. "And Duggan could come here to see her while you were out on another of those regular afternoon walks. We know he actually saw Miss Shaw because, just before he died, he happened to mention to me the way she—his client—had looked when she talked to him."

"I wish she had confided in me instead of a stranger like Duggan," said Charlotte. "I hate to think of her troubled and helpless, imprisoned by lameness and blindness, with no one near she felt she

her violet dress, holding her favorite book on her lap, the blue-and-gold Keats."

The thrill of a shock passed through Basil almost electrically, but he spoke softly. "Miss Shaw, who was blind and could not read?"

Charlotte looked at him with frightened eyes. "I—I never thought of that."

"What did you think?"

"That she was tracing the leaves and flowers tooled on the cover with her fingertips. The design is beautiful."

"What do you do with a book if you can't read it?" demanded Basil.

"Well," Charlotte floundered. "Sometimes you press a faded flower or fern leaf between the pages."

"And sometimes you leave a slip of paper there for safe keeping," added Basil. "If you were blind and wanted to keep a slip of paper without letting anyone else see it, what better hiding place than a book that was kept under lock and key? Especially if it were a book you could always identify with your fingertips because of the flowered design incised on the binding."

There was little trace of Miss Shaw now in the long room overlooking the street. It was just as if no one had ever lived there at all.

Charlotte opened the door of a closet, empty even of coats. "Dresses have gone to the Salvation Army. Furs and furs and one brooch were left to me. Other jewels went to Brinsley Shaw, with the hope that he would someday have a wife to wear them."

Basil thought of Isolda Canning and smiled a little. If ever Brinsley had a wife she wouldn't want those ugly old things of your aunt's. But there was one thing of Katherine Shaw's that she would appreciate—the fortune that Brinsley Shaw had just inherited.

Charlotte looked slowly around the room, so still and empty in the sunlight. "It's hard to believe she's gone. I can't look at this armchair without seeing her there as I found her that last afternoon when I came in from my walk. In

THE books were in boxes in the cellar. Charlotte's hand trembled as she held a flashlight for Basil. In the third box he searched he found the Keats.

He slid his fingertips under the spine at either end and shook the book, letting the pages flutter. A slip of paper slithered out and coasted zigzag to the floor. Basil held it close to the flashlight beam. It was a grimy piece of paper and someone had scrawled across it hastily in an unlettered hand.

Red from Jack Duggan's face, Basil read from Mar 26/ Apr 26 1935 J Bush

"But what can those letters and figures mean?" murmured Charlotte. "If only Miss Shaw had trusted me!"

Basil looked at Charlotte thoughtfully. "How can you be sure Miss Shaw herself knew what they meant? She couldn't read this slip of paper. She was blind."

## THE SEDALIA DEMOCRAT—Sedalia, Mo., Mon. May 19, 1952

### 'NOW We'll Get Some Action'

### The World Today--

#### Benefits to Korean War Vets

By JAMES MARLOW

WASHINGTON (AP)—Veterans of the Korean War will get benefits similar to those given World War II veterans if a measure approved by the House Veterans Committee is passed by Congress.

Before House and Senate okay such a bill, if they do, they may make changes. So the finished product is apt to be different from the committee version. But this is a quick look at it as it stands.

The benefits apply not only to members of the armed forces who served in the Korean theater but to all who were in the armed forces at home or abroad, on or after June 27, 1950.

Education—

If he served at least 90 days, a man gets 1½ days of education or training at government expense for each day of service, but no more than 36 months. And he must apply within two years after discharge.

Education and training allowance—

If he's enrolled in a course full-time, a Korea veteran gets \$10 a month if he has no dependents and \$150 if he has one or more. That's all. On that money he must live, pay his tuition, buy his books. What of a World War II veteran who was getting an education under the old G. I. Bill of Rights and then had his education interrupted by going back into the service?

He'd be entitled, upon his discharge, to finish out the time in school due him under the old G. I. Bill, plus whatever schooling he earned as a Korea veteran, but no more than a combined total of 48 months.

But a World War II veteran who didn't apply for his educational benefits before the deadline of July 25, 1951, set up for most World War II veterans, couldn't claim them now as a result of service in the Korean war. He'd get only the

### Clear Wreckage Of 59 Railroad Cars From Town

SAWYER, Mich. (AP)—Railroad wrecking crews moved in today to clear 59 cars of a derailed freight train, many of them piled up in the downtown area of this small Southwestern Michigan community.

State police reported no persons were killed in the spectacular Chesapeake & Ohio derailment. The train collided with a pickup truck at a crossing north of here. Three teenagers, passengers in the truck, were taken to St. Joseph's Mercy Hospital in nearby St. Joseph with critical injuries.

They were Shirley Pratt, 15, and Starr Brightbill, 16, both of New Troy, and Roland Sonnenberg, 16, of Sawyer.

Police said the truck rammed the middle of the long Grand Rapids-to-Chicago freight.

The fast train dragged the truck for 100 yards.

Railroad officials said the impact of the collision broke a brake beam on one of the cars causing the derailment of the other cars, which were scattered for half a mile along the tracks.

The town's 150-odd residents here were awakened by the terrific noise.

A freight station warehouse was wrecked by the tumbling cars. Two commercial buildings were damaged and two parked autos destroyed. Powerlines were broken.

Railroad section crew leaders said they probably would have normal service restored by noon today. Meanwhile, trains were being rerouted through Kalamazoo.

### Looking Backward

Twenty-five years ago C. E. Ducker, a former conductor on the MKT out of Sedalia, was owner of the Ducker Hotel at Poplar Bluff, a four-story structure, that was laid in ruins by the destructive tornado that struck that city.

A. T. Nelson, director of attractions for the Missouri State Fair, here from Lebanon, Mo., announced that a mammoth stage would be erected at the front of the grandstand for various entertaining features to be offered as amusement. Mr. Nelson was a member of the fair board.

Employees of the Cities Service Corporation in Sedalia, of which Henry L. Doherty was the head, with their families, had a picnic and danced at Liberty Park. An old fashioned basket dinner was a feature of the celebration in honor of Mr. Doherty's 57th birthday.

Dr. and Mrs. D. P. Dyer left for Washington, D. C., where Dr. Dyer attended a convention of the National Medical Association.

Forty years ago E. A. Sisson, formerly connected with the Postal Vending Company of this city, has established a business, the Lyons Machine Works, at Lyons, Ia. He has erected a building for the manufacture of novelties.

The annual business meeting of

### Democrat Pick-Ups

Odds and Ends  
By News Staff

A young minister from a nearby town was walking down Ohio one morning and when he reached the corner at Fourth he saw someone he knew coming down Fourth. He smiled, waved at them and carried on a bit of conversation, walking as he talked—right off of the curb and in front of a truck turning the corner.

The woman he was talking to called for him to be careful—the truck stopped—and the young minister, still smiling, walked on as if there was not a truck or a car within a mile of him, still looking at the woman and never even turning to look at the truck.

"Oh, I won't get hit," he said, passing so close to the truck he almost touched it. "They always stop."

Such faith as that should take that boy to the very top in the ministry—there could be no greater asset in spreading the gospel than faith in which there is not the slightest doubt—faith that you can walk in front of cars and trucks and they will stop. —HL

It is all in what you are looking for, whether it be stars or mud, but the glorious part of childhood is that they always see the stars.

A wreck on which a car and a truck collided happened one day on West Broadway and the truck was turned over on its side. Men, women and a few children rushed to the scene—most of them to just

the Missouri Press Association was announced to be held in Sedalia the week of the Missouri State Fair the first of October.

Roy Morris, editor of the Houstonian, who recently underwent an operation at his home in Houston, was sufficiently recovered to be able to make a trip to Sedalia for a business visit.

Timothy Tierney and George Hoffelbert were named by Gen. George R. Smith post GAR as delegates to the annual reunion at Macon, Mo., May 16 and 17.

In one month's test, a scientific team found 50 per cent of the time passed pleasantly, 28 per cent unpleasantly, and 22 per cent unpleasantly, according to the Encyclopedia Britannica.

Balcony ushers are better than censors in ridding the movies of torrid love scenes.

### The Washington Merry-Go-Round

#### 8 S. C. Justices OK'd Gov't Seizure of Property In Past

By Drew Pearson

WASHINGTON—A careful check of previous decisions by individual members of the supreme court shows that if they follow their own precedents they will vote with the government in favor of seizing the steel industry.

If, however, they live up to the words of the famed "Mr. Dooley" and "follow the election returns," they will probably find against the government.

At any rate, study of previous opinions and executive acts shows that eight justices, either before or after they got on the bench, have condoned drastic seizure of private property in time of emergency. Here is the score:

Chief Justice Fred Vinson—Was economic stabilizer under Roosevelt when the government seized Montgomery Ward mail order house. Though the United States was then at war, the seizure was rougher than the seizure of the steel mills. Federal troops actually entered the mail order house and bodily carried out Sewell Avery, head of the company.

Vinson was among the top Roosevelt advisers who recommended seizing the company.

Justice Sherman Minton — Sat on the 4th circuit court of appeals when it passed on the legality of the Montgomery Ward seizure and ruled in favor of the government.

Justice Tom Clark — Wrote a letter as attorney general placing himself on record that the President has "exceedingly great" power to "deal with emergencies." Clark wrote the letter, Feb. 2, 1949 to the Senate labor committee, then considering the same problem now at issue in the steel dispute. He maintained no law was necessary to give the President the power to join parties in a strike, since he already had the power.

"I might point out," Justice Clark wrote, "that the inherent power of the President to deal with emergencies that affect the health, safety and welfare of the entire nation is exceedingly great."

Justice Robert Jackson — Passed upon a seizure similar to that of the steel mills when, as attorney general in 1940, Roosevelt ordered the army to take over the North American Aviation plant in

California. Justice Jackson advised the President that his action was legal, though no war had been declared and no specific law was on the statute books.

During the recent steel arguments, however, Justice Jackson queried Solicitor General Perlman about the question of whether Korea was "war" or a "police action" in a manner which looked as if he had forgotten the North American Aviation case.

Justice Hugo Black — Wrote the majority opinion in one of the most notable emergency seizures in the history of the United States—the removal of Japanese-Americans from the Pacific coast immediately after Pearl Harbor. Though there was no law whatsoever for the removal of American citizens of Japanese descent, they were forced to evacuate their homes, give up their jobs, abandon their property, and were removed bodily to concentration camps.

Later the supreme court OK'd Roosevelt's unauthorized action.

Justice William O. Douglas — who now sits on the steel seizure, concurred in the emergency right of the President to seize the person and property of Japanese-Americans.

Justices Frankfurter and Reid—also concurred in the seizure of Japanese-Americans, though Justice Jackson dissented.

This makes a total of eight justices now on the bench who have gone on record, either as judges or as members of the executive branch of the government, that the President has the power to seize property in time of emergency.

Judging by some of the questions asked from the bench, however, the court may live up to Mr. Dooley's prediction.

Oriental and Prisoners

Shortly after the war, this column exposed the shameful way American prisoners were treated in Japanese prison camps. These conditions are important today only as a contrast with the kid-glove treatment U. S. authorities have given Korean-Chinese prisoners.

Without inferring that we should emulate the brutality of the oriental, the following condensed account (Merry-Go-Round, May 23,

### now! TRIPLE COMBINATION for relief of ... ARTHRITIC PAIN

This is the first announcement of a sensational new, triple combination for the relief of arthritic, rheumatic, neuritic, and other pains.

Triple combination—there has never before been anything like it—nothing that could possibly give you such relief and comfort to those who suffer—nothing that could offer such promise for a more nearly normal, pain-free enjoyment of life by day-to-day peaceful, health-building sleep at night.

Triple combination includes:

1. America's No. 1 anti-arthritis medication—plus
2. Salicylamide—made with 5 times the analgesic (pain relief) potency of aspirin—plus
3. Vitamin C—the vitamin essential to bone tissue production.

What a change from the old therapy you have been limited to. Salicylamide with five times the pain relieving action of aspirin is non-nauseating, non-habit forming, does not affect the heart or other organs.

Vitamin C is the health promoting vitamin that is found in delicious, refreshing, citrus fruits. These, with the No. 1 anti-arthritis medication in Triple Combination are for the fastest, longest lasting relief you ever have known.

This new Triple Combination was developed for you by the makers of famous PRUVO, recognized as a leader in

use anti-arthritis field, and is at your drugstore now. No prescription needed. Just ask for new PRUVO and you get the wonderful, new Triple Combination.

We might be justified in making statements about this new Triple Combination formula PRUVO—

but that has never been the PRUVO policy.

Instead, we simply want you to appreciate this fact: Only in new PRUVO you get the new 3-way Triple Combination—anti-arthritis for fastest, longest lasting, lowest cost pain relief.

Yes, actually lowest cost. The new, improved Triple Combination PRUVO sells at the old, low price of \$1.50. Savings come from the fact that you may use fewer new PRUVO tablets for greater, longer lasting pain relief.

New PRUVO comes to you fully guaranteed. You buy and try the \$1.50 bottle. PRUVO must give you the fastest relief from pain—the longest lasting relief or your money back from the makers. Use half the trial size bottle—75 tablets—then decide.

Today get genuine new Triple Combination PRUVO from your drugstore. Be sure it's PRUVO—the only Triple Combination. Start to live a more pain-free life. Start to enjoy more peaceful sleep. Work and play in greater comfort. New PRUVO should prove to be a new opportunity for you to live a more nearly normal life. Start with the economy trial size—only \$1.50. For further use PRUVO is packed in the home size \$4.00 and hospital size \$7.50—all Triple Combination tablets. Be sure you get genuine PRUVO for fastest, longest lasting relief.

## Miss Juanita K. Bockelman Becomes The Bride Of Robert D. Howard In Church At Cole Camp

A pretty wedding was solemnized at 4:30 o'clock Sunday afternoon, April 20, at Trinity Lutheran Church, Cole Camp, when Miss Juanita K. Bockelman, daughter of Mr. and Mrs. Francis Bockelman of Cole Camp, became the bride of Robert D. Howard, son of Mr. and Mrs. C. O. Howard of Gravois Mills, with the Rev. H. J. Gerike, pastor of the church, reading the double ring ceremony.

Lilies, baskets of yellow and white gladioli and lighted tapers in tall candelabra formed the altar setting.

A brief organ recital was played by Mrs. Lambert Heimsoth, who, also accompanied the soloist and played the traditional wedding marches. She wore an orchid corsage and her corsage was of yellow gladioli.

Miss Juanita Bahrenburg, soloist, sang "At Dawning," preceding the ceremony and "The Lord's Prayer" at the close of the ceremony. She was attired in a yellow formal and wore an orchid corsage.

The bride, who was given in marriage by her father, wore a white satin gown, fashioned with tight fitting lace bodice with nylon yoke, long sleeves tapering to points at the wrists and full skirt which lengthened into an aisle train. Her fingertip veil was fastened to a white satin bonnet trimmed with small pearls and she carried a bridal bouquet of white regalia lilies. Her only ornament was a single strand of pearls and matching earrings, a gift of the bridegroom.

Mrs. Robert Oelrichs, sister of the bride, was matron of honor. She wore a pink gown designed with lace bodice and full net skirt with matching mitts and carried a bouquet of pink gladioli.

Miss Irma Jagels, bridesmaid, wore a blue gown, styled like that of the matron of honor and carried a bouquet of yellow gladioli.

Jean Holsten, flower girl, wore a frock of white satin and Joe Howard, nephew of the bridegroom, was ring bearer.

Forrest Howard, brother of the bridegroom, served as best man and Darrell Polly was groomsmen. Ed Jenkins and Robert Oelrichs were ushers.

Mrs. Bockelman, mother of the bride, wore an orchid dress with white and navy accessories and a corsage of white carnations. Mrs. Howard, mother of the bridegroom, wore a black and white dress with white accessories and a corsage of white carnations.

Following the ceremony a wedding dinner was served at the home of the bride's parents to the immediate relatives of the couple and the bride party.

A three-tiered wedding cake, decorated with yellow roses and a miniature bride and groom, centered the bride's table and on either side were lighted tapers in crystal holders.

A reception was held at 7 o'clock for relatives and friends.

The couple left on a wedding trip to the Ozarks after which they will reside in Kansas City. For traveling the bride wore a navy blue dress, trimmed in white with navy accessories and a corsage of white gladioli.

The bride is a graduate of Cole Camp High School in the class of 1949 and attended Central Missouri State College, Warrensburg. For the past eight months she has been employed in Kansas City with the Cities Service Oil Company.

Mr. Howard is employed with the Bensons Manufacturing Company in Kansas City.

## Give Shower For Mrs. Van Natta

Mrs. Frank Van Natta was honored with a pink and blue shower recently by Mrs. Oscar Kemp, Mrs. Elmer Rhine and Mrs. Louis Bickel at the home of Mrs. Kemp.

The gifts were placed on a table centered with a large doll under the chandelier which was festooned with pink and blue colored streamers.

The afternoon was spent in playing games with awards going to Mrs. Harold Romig, Miss Lulu Wheeler, Mrs. Stanley Woodward and Mrs. Freddie Moon.

Refreshments were served. Invited guests were: Mrs. Van Natta, Mrs. C. C. Colaflower, Mrs. Albert Strickfaden, Mrs. Stanley Woodward, Mrs. C. E. Romig, Mrs. Charles Fichter, Miss Lulu Wheeler, Mrs. F. C. Romig, Mrs. George Fichter, Mrs. W. F. Kendrick, Mrs. C. Lemler, Mrs. W. S. Mauley, Misses Mary and Nadine Stine, Mrs. Dora Van Natta, Mrs. Mamie Gentry, Mrs. Harold Romig, Mr. J. R. Van Natta, Mr. L. J. May, Mrs. N. W. Dorrance, Mrs. Freddie Moon, Mrs. D. E. Edwards, Mrs. C. M. Ferguson, Mrs. George Farris, Diane Van Natta, Mrs. Jack Layne, Mrs. E. Carry, Mrs. R.

Mills, Mrs. Louis Benz, Mrs. Leo Morris, Miss Dora Benz, Mrs. J. P. Dunn, Mrs. William Arnold, Mrs. Ernest Benz, Mrs. Dick Whitfield, Mrs. Ida Painter, Mrs. J. E. Farris, Mrs. Willis Johnson, Mrs. G. D. Farris, Miss Ruth Evelyn Farris, Mrs. C. E. Ferguson and Mrs. Byron Oswald.

## Sam Stedman, Former Sedalian To Receive Honor at Central

Six distinguished alumni of Central College will receive alumni plaques at a special recognition service to be held Sunday night, June 1, in the Linn Memorial Methodist Church, Fayette, according to the announcement made today by Dr. Ralph L. Woodward, president of the college.

The group honored this year includes: Sam Stedman, partner in charge of institution advisory department, Carl M. Loeb Rhodes, Co., New York City. Formerly of Sedalia.

Dr. Jordan Alexander, head of the department of Biology, University of Colorado, Boulder. Born at Rich Hill, Mo.

Miss Hamako Hiro, president of Hiroshima Jogakuin, Hiroshima, Japan.

Mrs. Martha Smith Luck, executive secretary and lecturer University College, Northwestern University, Chicago. Formerly of St. Louis.

Judge W. W. Lesley, district judge of the 18th judicial district, Bozeman, Mont.

Dr. M. Thomas Van Studdiford, physician of New Orleans, La. Formerly of Jonesburg.

**Robert Cahill Joins Air Force Human Resources Research**

Airman Robert J. Cahill, Sedalia, has received a Texas assignment with the Air Force Human Resources Research Center.

Cahill, son of Mrs. Ruby K. Cahill, 1423 South Moniteau, has reported for duty at the center's headquarters at Lackland Air Force Base, San Antonio, Tex.

Entering the Air Force March 7, Cahill recently completed his basic training at Lackland.

He is a graduate of Smith-Cotton High School.

The Research Center has 18 laboratories and operating units at 14 Air Force bases in eight states. The center has over 1,000 military and professional personnel who conduct scientific studies for evaluation of Air Force personnel and for the improvement of training.

**Rev. Elmer L. Hobbs To Speak at Central**

The Rev. Elmer LeRoy Hobbs, superintendent of the Kansas City district in the Southwest Missouri Conference of the Methodist Church, has been selected as the speaker for the baccalaureate service at Central College on Sunday, June 1, according to Dr. Ralph L. Woodward, president of the college. The service will be at 10 a. m. in the Linn Memorial Methodist Church on the campus of the college.

**PTA Convention Opens With Plea for Peace**

INDIANAPOLIS (AP)—The National Congress of Parents and Teachers opened its 56th annual convention today with a plea for world peace built from the level of the home.

Mrs. John E. Hayes of Twin Falls, Idaho, president, keynoted the convention, saying, "The slender but unflinching threat of love for a child can be used to weave a world community fabric so strong that it can contain the elements of lasting peace for all the world."

Large coal resources are found in 28 of the United States.

## Knob Noster Hi Seniors Enjoy Week of Events

KNOB NOSTER — Last week was senior week for the Knob Noster graduates. Monday was kid day with all the seniors dressed as tiny tots. Wednesday the juniors and seniors enjoyed a breakfast at Knob Noster State Park. The junior-senior banquet was held Friday night in the school auditorium.

The senior colors, blue and silver, were carried out in the decorations. The auditorium was a Hawaiian scene and on a blue and silver background were the words, "Koma Mai". Paper monkeys were hung from the palm trees. The small tables were centered with jonquils and blue and white tapers. Paper monkeys were attached to the nut cups and favors were ukelele booklets in various colors.

The waitresses, Carmela Lee Hanes, Lynell Blacklock and Regina Henderson, were dressed in bright colored circular skirts, peasant blouses and leis.

The waiters, James J. Lyle, and Tommy and Sammy Harfield, wore bright colored shirts and leis.

During the banquet Miss Estelle First played piano music.

The program: invocation, Mary Ann McCannan; toast, Delores Fockler; welcome, Harlen Sinter; acceptance, James Dagsen; introduction of speakers, Wayne Miller, address, superintendent, A. C. Tesque; presentation of key, Cecil Peterman; acceptance, Richard Skidmore.

The following floor show was presented: song, "Lovely Hula Hands", Merrilyn Anderson.

**Playhouse Election Meeting Wednesday**

The Sedalia Community Playhouse will have a meeting Wednesday, May 21, in the board room of the Chamber of Commerce office at which time election of officers for the coming year will be held, according to the president of the organization, Larry Riley.

The new officers will take office immediately and appoint the play selection committee and other committees to start work on next season's productions.

Mr. Riley would like to have a people interested in the Sedalia Community Playhouse attend this meeting whether they are members of the organization or not.

**SPECIAL INVITATION**  
To the DEAFENED—All Hearing Aid Users and All Non Hearing Aid Users.

Come to FREE HEARING AID CLINIC at Sedalia, Mo., Hotel Bothwell, May 21, 1952. Hours 1 to 5 p.m.

\* GET YOUR FREE COPY of the most Wanted BOOK entitled U.S. GOV. EXPOSE OF HEARING AIDS

Limited Supply—use enormous Public Demand. This book can save you \$8888 and disappointments. Just read this book and learn for yourself. Why you and others say "MY NEXT AID WILL BE AN ACOUSTICON," the fitted aid for BEST in Hearing and Best in SERVICE DEPENDABILITY.

Waggener, qualified Hearing Aid consultant, will be in charge. If unable to come—phone Hotel or Write and he will come to your home. Batteries—Repairs and accessories for all make aids.

Acousticon Allen Co., 6 E. 11th St., C. Mo. (Midwest Largest Acousticon Distrib.)

Dorothy Lane and Wanda Lee Lyle; Hawaiian tap dance by Kay Kurtz; song, "Blue Hawaii", Merrilyn Anderson, Dorothy Lane and Wanda Lyle; song and dance, "Walking Love Ukelele Style", Darold Deterding, Donna Ann Wampler, Gloria Hoverton and Delores Fockler; song and dance, "By the Light of the Silvery Moon", Wilma Lyle, Delores Fockler and Wanda Lyle; song and dance, "Moonlight Bay", Gloria Hoverton, Billy Richeson, Donna Ann Wampler and Richard Skidmore.

Miss Estelle Fight and Miss Wilma Lyle accompanied the numbers.

Following the banquet a prom was given by the seniors.

Sunday, May 18, baccalaureate services were held in the school auditorium with the Rev. Lloyd D. Wasson speaking. His subject was "You Are You".

"Grand March" was used as processional and recessional. The Rev. O. A. Blaylock gave the invocation and Elder John Nutt read the scripture lesson. The benediction was given by H. A. Wimer.

The girls' glee club sang, "Hear Me, Lord" accompanied by Miss Lyle.

**Miss Edwards Returns From Rochester, N. Y.**  
Miss Margaret Edwards, 1502 South Osage, has returned home from Rochester, N. Y., where she has been since April 25 at the home of Mr. and Mrs. Clyde Moulin and Mrs. Moulin's mother, Mrs. E. B. Lyon. Mrs. Moulin, the former Velma Lyon of this city, underwent a major operation and Miss Edwards stayed with Mrs. Lyon while Mrs. Moulin was in the hospital. She has recovered satisfactorily. While there Miss Edwards saw many things of interest, one of which was the lilacs in the park where there are hundreds of bushes in a variety of colors and types. One day was set aside as Lilac Day when thousands of people from Rochester and surrounding communities went to the park to see the lilacs.

## Baby Robins Get New Home In City Drama

WAUKESHA, Wis. (P)—It's a new life, and new parents, today for three baby robins that were born where robins oughtn't to be born.

The drama began in the joists of a bare structure built to house a new vault in the basement of the Waukesha National Bank. The addition was complete but for a large hole in the ceiling, left to admit the vault door, when a labor strike some weeks ago idled the workers. Into the deserted room moved Mother and Father Robin and soon there were five.

Last week the strike ended. The ceiling hatch, it was announced, would have to be fixed by today. Then the robins were discovered.

Residents of this Southern Wisconsin community poured out ideas on how to rehabilitate the robins. Soon letters and calls were coming from other parts of the nation as the story spread.

Radio station WAUX, the bank and the construction company working on the vault building offered a \$25 defense bond for the best idea.

Since the construction crew had to get to work in the morning, Mig Figi, general manager of WAUX, and Jack Schomake, Superintendent of the crew, took the nest from its perilous perch and moved it to the roof of the bank building last night, placing it under a shelter they erected. The mother and father robins stayed in the vicinity but apparently did not see where their babies were taken. They did not go near the transplanted nest but flitted in and out of the vacated basement room in confusion.

Night fell and it grew cold. Still the parents could not be guided to their nest on the roof.

Finally, Figi and Schomake took the three cold and hungry baby robins, not more than a few days old, to a tree in Schomake's front yard, where eight feet up another robin family lived. Figi climbed up, removed three young robins from the nest and placed the three bank babies there.

The foster mother robin settled down peacefully on the nest with her three new youngsters, and the male robin alighted with worms.

The robins taken from the nest in the tree—older than the bank babies—will be taken care of by a woman who raises birds.

Figi said the winner of the \$25 savings bond would be announced tomorrow.

## South's Baptists Reelect J. D. Gray As The President

MIAMI, Fla. (P)—Thousands of Baptists headed home today after the largest and most successful meeting of the Southern Baptist Convention in its 107-year history.

The convention closed last night in Miami's Kinner Key Auditorium where 11,003 messengers attended the 8-day gathering. They represented 28,289 churches and 7,372,498 members.

Evangelism and singing closed the session, with 12,000 in the auditorium and several hundred others outside to catch the breezes that swept in from Biscayne Bay.

Three sessions were held on the final day. Rev. J. Howard Williams of Dallas, Tex., spoke at the first session on "Salute to the Church." Rev. Robert E. Naylor of Columbia, S. C., addressed a later meeting on the Training Union for Youth.

Dr. Baker James Cauthen, director of foreign missions in the Orient, addressed the closing session, dedicated to missionaries. A massed choir of 1,000 voices provided music.

On Saturday night Evangelist Billy Graham addressed an estimated 20,000 at a youth rally.

Dr. J. D. Gray of New Orleans was re-elected president of the convention by unanimous vote. The convention will meet in Houston, Tex., next year and in St. Louis in 1954.

The convention went on record as protesting to the President and Congress appointment of an ambassador or any personal representative to the Vatican.

Another resolution called for a program of protest against radio and television shows of "low moral tone" and the convention's radio commission was instructed to give the widest possible emphasis to the plea for better programs.

## House Opens Debate On Global Strategy

WASHINGTON (P)—The House opens debate on American global strategy this week, with chief interest centering on how much should be spent on foreign aid and where.

The issue is a \$6,889,100,000 foreign aid program for the fiscal year beginning July 1. The measure is scheduled to reach the House floor late Tuesday or Wednesday.

The main dispute will be on the cost of the bill. But the discussion is expected to range from the value of the defense buildup itself to the wisdom of plans to include Spain in the defense array.

## Fall From a Car Fatal to Small Boy

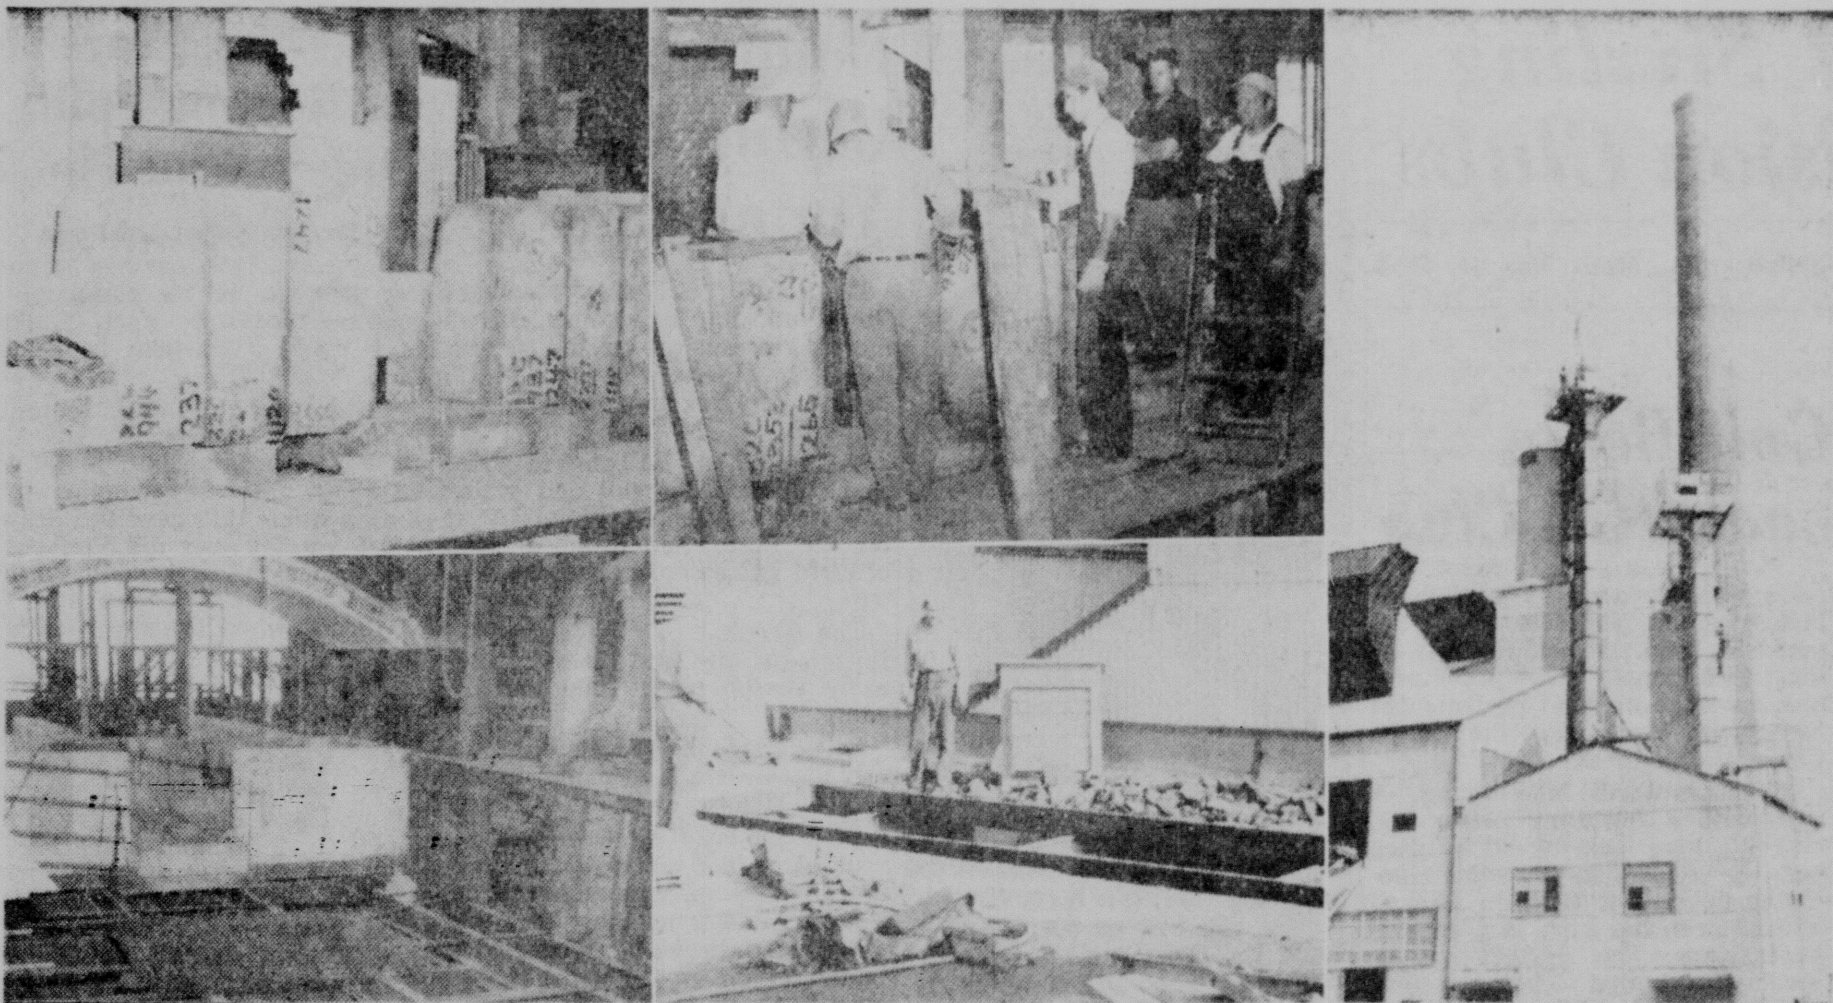

HARRISONVILLE, Mo. (P)—Two-year-old George C. Forshey of Joplin was injured fatally yesterday when he fell from his parents' automobile on U.S. Highway 71, south of Harrisonville.

He was the son of Mr. and Mrs. Leon Forshey of Joplin.

The boy's grandfather—George Forshey, 65, of Joplin—was riding in the back seat with George and his three-year-old sister, Patricia. The grandfather said the two youngsters were scuffling and suddenly the door flew open, and George fell out.

(Top left), these specially cast refractory blocks form the side of the new furnace; weights of the individual blocks vary from 1102 pounds to 1247 pounds. (Top center), Foreman Herb Cox, in dark shirt, watching three furnace specialists placing a large refractory block in the side of the new furnace; L. B. Comer and Marvin Lutjen (on the left and right of Cox) stand by to assist. (Bottom left), steel supports for the new glass melting furnaces; in the background is a portion of the old furnace; steel I-beams will be placed on top of these heavy steel beams to form the support for the bottom of the new furnace. (Bottom, center), V. L. Abney, welder, and W. A. Schuler, helper, complete steel work for new ventilating equipment for Foamlas plant; the new equipment is designed to improve working conditions for the cellululating department employees. (At right), another phase of activity during furnace repairs — the men on the left are making repairs on the mixed batch elevator for the Foamlas furnace; on the right an employee is ascending the crushed Foamlas elevator. Repairs to all equipment are being carried on during the furnace rebuilding. —Photos by Ote Wiley.

## Warning of Coming Tornadoes Takes Terror Out of Twisters

By SAUL FELDMAN

OKLAHOMA CITY (P)—Tornadoes still strike often with deadly force and destruction, but men are beginning to take some of the terror out of the cry: "A twister is coming."

Right now, the main aim of weather forecasters is to warn residents in the path of the swirling black funnels, but there is also the hope that perhaps some day scientists may be able to take the sting out of the tornado.

Oklahoma is part of the testing ground for tornado warning development and with the electronics age and the success of weather forecasters in predicting conditions favorable for tornadoes, more and more people of the prairie country are relying on the radio to warn them when to seek shelter.

The scientific approach to tornadoes is an exacting one, and a warning is sent out only after the checking of data reported by hundreds of weather observers throughout the country.

Three different groups in Oklahoma are concerned with tornado forecasting and tracking.

The weather bureau this year for the first time is giving wide publicity to tornado forecasts; the severe storm warning center at Tinker Air Force Base in Oklahoma City issues warnings for military installations and Oklahoma A. & M. College is doing research on tornado tracking.

The Tinker warning center was

## House Considering S. S. Benefits Hike

WASHINGTON (P)—A proposed 300-million-dollar increase in social security benefits comes before the House today with strong bi-partisan backing.

The bill, sponsored by Chairman Doughton (D-NC), of the Ways and Means Committee, would increase benefits for practically all retired persons now on the rolls by \$5 a month or 12 1/2 per cent, whichever is larger.

## Wife Will Try Again To Cross Atlantic In 23-Foot Boat

PLYMOUTH, Eng. (P)—A 38-year-old widow, whose husband drowned when the couple tried to sail across the Atlantic three years ago, is attempting the risky crossing again—and alone this time.

In her 23-foot boat she hopes to become the first woman to make the solo crossing.

"I must be mad," said Mrs. Ann Davison as she set sail yesterday for Florida. But she feels, she said, that she has to make up for the failure and disaster of her last attempt. On that trip her husband and their 70-foot yacht were lost after a 19-day struggle against gales.

The officers began compiling weather data and using it to warn military installations of severe storms.

"Finding these conditions and putting them together is just like baking a cake," Fawbush explains. "You have to mix the ingredients in the proper order and provide the proper temperature to get the right results."

The severe storm center has found that the conditions needed for a possible tornado are narrow bands of moist southerly winds with stronger bands of winds on top and a squall line of colder air moving from the west so that they will collide.

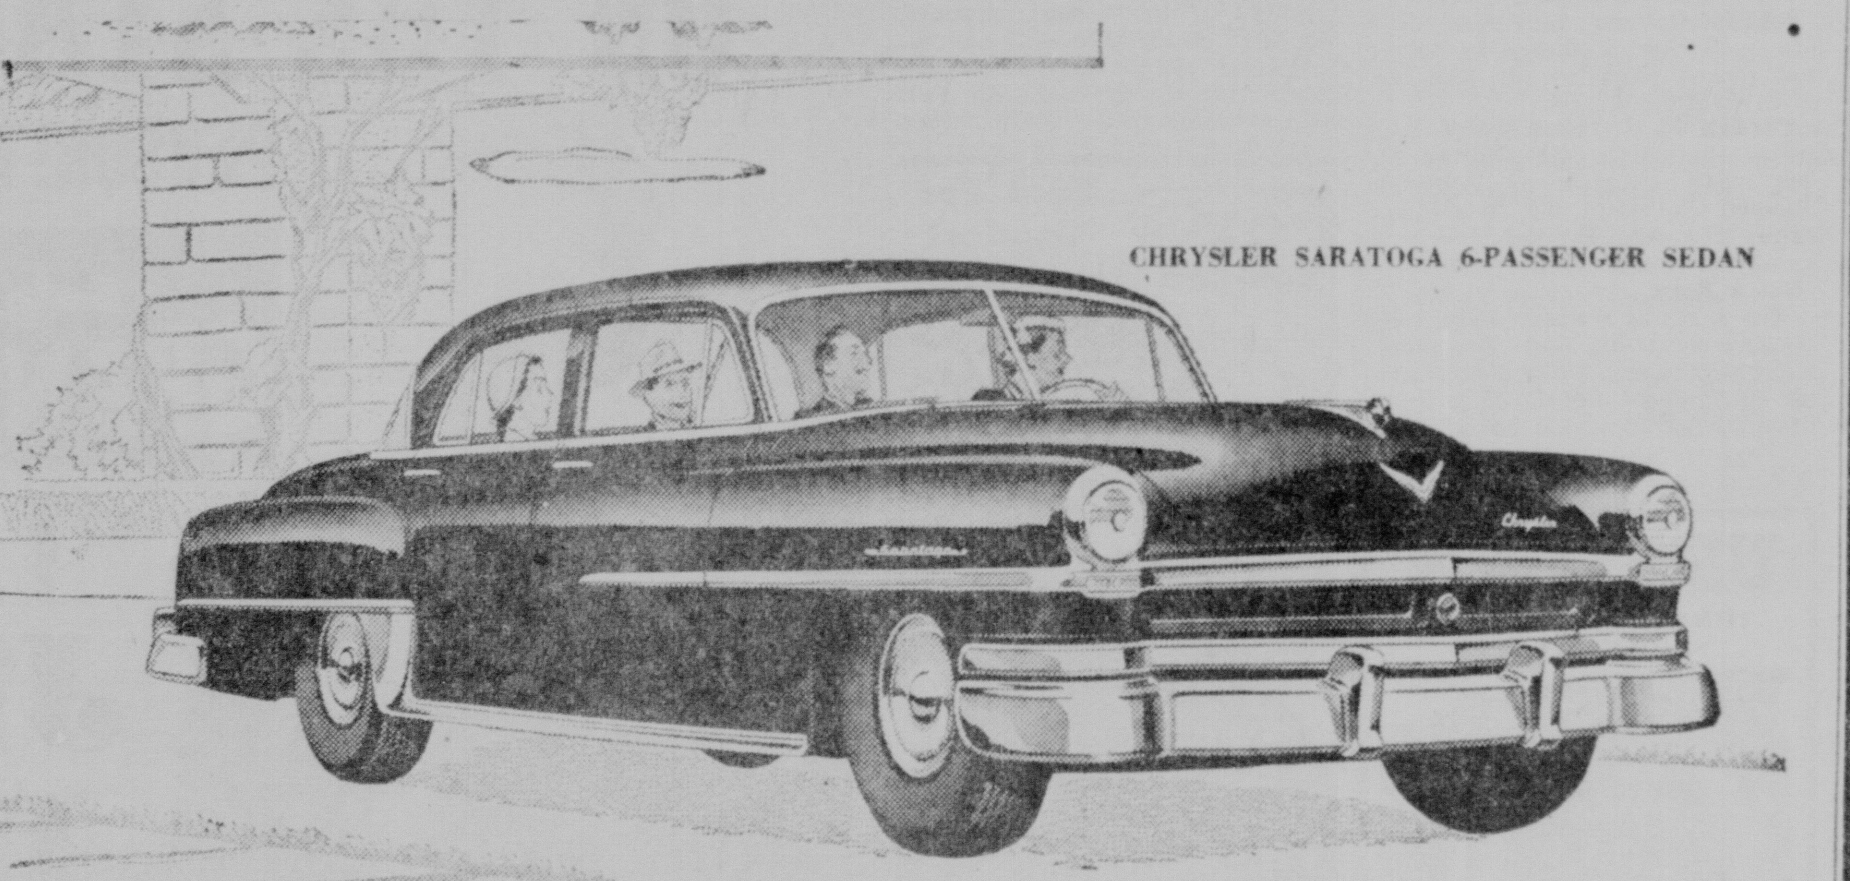

These are the conditions needed, but they don't always end in a tornado. The squall line, which is trigger.

With the warm air moving under the cold air of the thunderstorms, the atmosphere becomes out of balance because of the severe differences of temperature. "The warmer air, which is light, starts to rise rapidly to regain the equilibrium and here is created the maximum instability."

The winds, their direction, temperatures and moisture contents all must be taken into consideration in the forecasts.

## ITS NEW KIND OF HORSEPOWER IS SOMETHING TO FEEL!

With its 180 HP V-8 engine, on 125 1/4 inches of wheelbase, many people think the Saratoga is the best Chrysler car of all.

We invite you to take the wheel and feel what happens! There's a new sense of easy power, of reserve power that make driving a new experience.

Its revolutionary combustion chamber develops more of the power in each charge of fuel than other engines can do. One result is performance, even on non-pre-

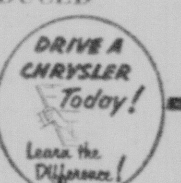

mium fuel, such as you have never felt. Another result is new economy. It's an engine that scarcely forms carbon at all. It creates less heat. It will last much longer, stay younger on the way!

And with Chrysler full-time Power Steering, you steer with one-fifth the usual effort... drive with five times the usual control! With Power Brakes you need up to two-thirds less foot pressure... and still stop in many feet less than other cars can do.

Yes, behind Chrysler's new engine you'll find a new kind of car. Won't you come in and feel what we mean?

\*NOTE: Power Steering standard on Crown Imperial, Antioch, extra, on any new Chrysler.

## All Senators Will Hear Ridgway Tell Of Koje Incident

WASHINGTON (P)—All 96 members of the Senate have been invited to attend a closed-door session of the Armed Services Committee Wednesday at which Gen. Matthew B. Ridgway will be questioned about the Koje Island incident.

A dispatch from Seoul today said the Eighth Army reported a board of inquiry has completed its investigation of the seizure and release of Brig. Gen. Francis T. Dodd by Communist prisoners of war on Koje Island.

The findings have been forwarded to Gen. Mark Clark, supreme Allied commander in Tokyo, who will send them on to Washington. The nature of the findings was not announced.

Ridgway, former Tokyo commander, is in this country en route to Europe to take over Gen. Dwight D. Eisenhower's command of the North Atlantic Treaty Organization forces.

## Bookmobile Route Expanded to SAFB

The Missouri State Library Bookmobile has added the Sedalia Air Force base to its routings. The Bookmobile serves Cooper, Pettis and Saline counties.

The Bookmobile made a stop at the SAFB last Friday at which time Miss Mary K. English, librarian at the Sedalia Public Library; Miss Margaret E. Gates, Bookmobile librarian and Miss Marjorie Reed, her assistant, both of Jefferson City, were present.

Books loaned to the SAFB by the mobile unit are maintained at the base chapel in charge of Tech. Sgt. Lawrence Willey, who is temporarily acting as base librarian.

## Kerr Predicts He'll Be No Worse Than 4th on First Ballot

BOISE, Idaho (P)—Sen. Robert S. Kerr predicted here yesterday he would be no worse than fourth on the first ballot at the Democratic national convention in July when it meets to choose the presidential candidate.

Kerr termed the failure of Washington Democrats to instruct their delegation a "stunning setback for Sen. Estes Kefauver and a very forward step for me."

# Bobby Brown Hurls No-Hit Win Over S-C

The Sedalia Ban Johnson Chiefs beat the Smith-Cotton Tigers 3-1 Sunday night behind the brilliant no-hit pitching of Bobby Brown, who faced only 27 men. This was the first game of the season for the Chiefs.

Brown pitched perfect ball for eight and a third innings. In the ninth the first hitter, "Skip" Schulz, hit a fast ball back at Brown, hitting him on the left knee. Brown went to the ground, but got Schulz at first with a good throw. The next man, Floyd Burton, walked. Brown then struck out Bill Arnold and Burton was thrown out trying to steal.

The Chiefs scored in the second and sixth innings. The first run came on a walk, a stolen base, and an error. The sixth was the big frame, with two runs scoring on three hits.

Brown faced only 27 men and struck out 14 in his first game of the year. Don Delph, Tiger hurler, pitched good ball all the way, allowing but five hits and three runs. He was relieved in the seventh by Bill Arnold, who allowed one hit and struck out three. Delph struck out five.

The Tigers made two errors in the field and the Chiefs played errorless ball.

Brown was also the leading hitter for the Chiefs, getting four singles and driving in the second run in the sixth.

Donnie Higgins and John Cochran were the only other Chiefs to connect for base hits. Higgins got his in the sixth off Delph and Cochran's came in the sixth off Delph.

The Tigers will go to St. Louis Thursday to play in the State High School Baseball Tournament. They will go against Central of St. Louis, which has won the state championship the last three years.

Manager Cecil Glenn said the boys will go by car, leaving the high school at 7 a.m. Thursday.

The Chiefs will play Town and Country Tuesday at 8 p.m. at the Liberty Park diamond. The battery for the Chiefs will be Barnes and Nold against Imhauser and McCoy for Town and Country.

# First Rate Hurlers Set Sizzling Pace With Second Division Clubs

By JOE REICHLER  
AP Sports Writer

Little Bobby Shantz and big Gerry Staley, a pair of first-rate pitchers with second-division teams, are setting a terrific pace for the other 164 major league hurlers.

Shantz, the 5-foot-7 Philadelphia Athletics' southpaw, yesterday became the first American League pitcher to win six games as he shut out the Cleveland Indians, 2-0. Staley, 6-foot-5 St. Louis Cardinals' righthander, became the National League's first seven-game winner as he felled the Philadelphia Phillies, 4-3.

The 26-year-old Shantz now owns more than half of the seventh-place Athletics' 11 triumphs. Staley, two years older, has registered exactly half of the fifth-place Cardinals' 14 victories.

Shantz surrendered only three hits to achieve his first shutout in the opener of the doubleheader with Cleveland. The Indians came back to register a shutout victory of their own as Mike Garcia blanked the A's, 6-0, despite yielding nine hits. Bob Feller was the Cleveland loser. The former strike-out king gave up only seven hits but two of them were home runs by Eddie Joost and Gus Zernial to account for both Philadelphia runs.

The Indians retained their 2½-game lead in the American League. The second-place Washington Senators were held to a split in their twin bill with the Chicago White Sox. A bases-loaded single by Ray Coleman produced two sixth-inning runs and gave the White Sox a 6-4 victory after Lou Slear had pitched the Senators to a 2-1 triumph over Saul Rogovin in the opener.

Boston's Red Sox remained in third place with a 7-4 win over Detroit while the New York Yankees and St. Louis Browns divided a doubleheader. Vic Raschi hurled a five-hit 8-1 triumph for New York after the Browns had eked out a 4-3 decision in the first game.

Brooklyn took undisputed possession of first place in the National League, thrashing the Chicago Cubs, 7-2.

The New York Giants were kept idle because of an all-night and early-morning rain. The Giants were supposed to have played two games with the Pittsburgh Pirates.

Brooklyn collected only four hits but three Bruin hurlers handed out 10 free passes and hit two batters to set up all Brooklyn runs. Unbeaten Preacher Roe helped win his fourth game with a pair of run-scoring singles and catcher Rube Walker knocked in two with his first homer of the season. Knuckleballer Willie Ramsdell, former Dodger, was the loser.

Dick Sisler, former Philly, helped the Cards nip his former mates by belting in two runs with a pair of singles. Staley had a 4-0 lead until the ninth when Willie Jones shelled him from the mound with a three-run homer. Eddie Yuhas retired two batters, gave up a double and gave way to Al Brazie. The veteran southpaw retired the side.

Veteran Vern Stephens, starting at shortstop for the first time since 1950, smashed a three-run homer, scored twice, was the middle man in two double plays, and handled nine chances flawlessly in Boston's win over Detroit. Stephens was in the lineup, along with second baseman Billy Goodman, when Manager Lou Boudreau benched shortstop Jim Piersall and second baseman Ted Lepcio for the first time this season for non-hitting.

# Difference In Grass Stand Seen on Recent Pasture Tour

## Eight Farmers Here Visited, Group Sees How to Get Yields

A big difference in the stands of grasses on different farms was seen on the recent pasture tour, held May 9, states Roy I. Coplen, county extension agent.

After applying raw rock phosphate, as all the eight farmers visited had done, after the lime requirement was met, after the recommended amount of potash had been applied as well as a starter fertilizer used, to have little or no grass except timothy is unpleasant and disappointing. Then, too, the cost of the seed either bromegrass, orchard grass or fescue is no little item. Again, since ladino in these fields where anyone of these grasses is thin, will spread, the bloat hazard is a problem. While timothy was thick where the other grasses were thin any way for two or three years hold down the bloat hazard, yet when the timothy thins out in about three years—as it does in heavy pasture—a most unsatisfactory condition will exist. Little grass and lots of ladino is the result. This increases the bloat hazard to a point that most farmers—if they know the danger—won't want to take the risk that occurs from pasturing cattle or sheep on the field.

Now what to do? This will be a question facing those farmers who failed to get the grasses seeded at the correct time. This nearly straight ladino crop can best be used for hog pasture, but it in most cases does not fit into the program of the individual. Ladino is not a good hay crop because of the difficulty of harvesting and curing.

What about seeding one of the three grasses, bromegrass, orchard or fescue, in the thick stand of ladino after the timothy goes out? It just doesn't work. Ladino may be seeded with success after a good stand of these grasses are established but seeding the grasses on a good stand or a medium stand of ladino just won't make you happy.

What we are leading up to is the proper time of seeding bromegrass, orchard grass, or fescue. The agent's first choice would be from August 25 to September 10.

While timothy may be seeded up into October with a good chance of success, yet this is not the case of these other grasses. Their chance of withstanding the winter freezing and thawing reduces rapidly when seeding is later than September 15.

Now the question arises what to do if there is inadequate moisture from August 15 to September 15 to seed the grass. One answer is to plan several weeks to three or four months in advance for this probable lack of moisture from August 15 to September 15. If one wakes up some morning in August and decides he is going to do, to 500 pounds of beef per acre or 10 times this much milk for 8 years or more he normally will not be successful. He may go out and take some soil samples to determine the kind and the amount of plant food he needs. He may find that there are 100 samples ahead of him and may have to wait several days for a test. Then he orders his lime and has trouble in getting the plant food he needs. Now it may be September. The raw rock phosphate should be plowed under. Hence he waits until it's applied before he plows. The ground may be hard and dry and difficult to plow and to get a good firm seed bed. Lack of moisture may make it inadvisable to seed until a heavy rain about September 22. This is an example of what not to do.

A much better plan is to test the soil now, find out what is as possible after the oats are harvested, after applying the lime and most of the fertilizer. This is best done early before the ground gets dry or it gets too dry to plow immediately after oat harvest, plow as soon as possible. Plowing early will result in a firmer seed bed and less work. Frequent discing or harrowing of the more moisture will be conserved.

If the field to be renovated is in blue grass pasture a good practice is to plow in late June or early July after soil treatment. Well, suppose even with all this preparation the soil is too wet or too dry to seed the grass by September 15. In this case the field may be seeded to wheat or barley and the seeding of grass made the following August or September. Or it may be seeded to timothy and lespedeza. Since timothy seed is usually cheap this is not an expensive operation. Then the field may be seeded to the bromegrass, orchard grass or fescue and ladino the following year.

The difference in the stand of grasses due to different seeding dates, as seen on some of the farms visited May 9 justifies a lot of planning to get seeding done between August 15 and September 15.

## "ONE SHOT"

### HOG CHOLERA VACCINE

Crystal Violet—Blood Origin  
This safe vaccine causes no "reactions" . . . cannot cause or spread disease. Does not require change in your feeding program. The dosage is the same, 5 cc. for all hogs regardless of size.

IMMEDIATELY AVAILABLE

ONE SHOT DOES THE COMPLETE JOB!

COLORADO Hog Cholera Vaccine is produced and tested under U. S. Government supervision.

Cut Main Street Rate Drugs

## Extension Club of the Week

### Oak Grove Club Organized Even Before County Had Home Demonstration Agent

#### Oak Grove Homemakers Extension Club

By Mrs. Roy A. Petty, Historian

In the year of 1922 before Pettis County had a Home Demonstration Agent the ladies of the Oak Grove Community were invited to the home of Mrs. Edna Turner and that afternoon organized which we called then "The Oak Grove Community Club." Mrs. Turner was elected to be our first president and we voted to meet once every month. Charter members of this group were: Mrs. Edna Turner, Mrs. Grover Hull, Mrs. Sinnie Reed, Mrs. A. A. Romig, Mrs. John Bradford, Mrs. William Arnold, Mrs. Clifford Mawhorter, Mrs. Charles Mawhorter, Mrs. W. C. Mewes, Miss Myrth Mewes, Miss Jessie Turner, Miss Ruby Turner and Mrs. J. M. Mawhorter. One of the earliest accomplishments of the club was the serving of hot lunches in our school. This group of women were interested in improving their homes and surrounding grounds and learning new ideas and methods pertaining to their task of home making.

Coming into the community in 1928 where women of this type were working simplified the task for Mrs. Claire Montgomery who was Pettis County's first Home Demonstration Agent.

The ladies wanted a club home of their own and no efforts were spared to make money. Sale dinners were served, pie socials were given, the community being canvassed and friends and business acquaintances gave donations. Not only were the women of the community working toward this goal but the husbands, fathers and brothers were working to help in every way they could. A church building which was not being used was purchased for our club house. In this building we now have dinners, picnics, parties, club meetings and all kinds of good times. To keep our building in repair, purchase a piano and re-roof it a musical program sponsored by the club was given. Window sales, and three plays of which different members of the community took part were given in several communities.

The club sponsored the organizing of the 4-H club in 1929 and much progress, enjoyment and profits has been derived from the 4-H work, some of the members of the early 4-H Club are now members of the Homemakers Club and are now teaching 4-H work.

The "Year Book" was introduced to our club in 1935 by Mrs. Charles Mawhorter who was then our president and dedicated to Mrs. Claire Montgomery. Mrs. Montgomery liking the idea of the year book so well, she provided all clubs of Pettis County with year books the following year and that practice has been continued. In the time that Mrs. O. F. Gorrell was our president and wishing for a new way in which to open our meetings brought to our meeting the "Collect" written by Mary Stuart. The "Collect" is now in all year books in Pettis County Extension Clubs.

The club members decided that the weather in August was just warm for regular meetings and thought of having a picnic for members, friends and their families provide to be a success and for the past thirty years it has become a custom. We enjoy this month by having picnics, fish fries or going to the Liberty Park in Sedalia. We plan four good times this year and for many years we always looked forward to the Thanksgiving dinner in October we observe our anniversary by having a chicken supper of which members and their families always enjoy.

The club has followed extension service program as planned by the state and county council and in this way we have received the "Standard of Achievement" certificate each year.

Besides carrying the regular projects we have helped with the blood bank, the U. S. O., taken courses in First Aid, Food Nutrition, Home Nursing and assisted in Red Cross Work. We have 22 members at the present time.

When our club was organized we wanted to know our neighbors better, to improve our homes, to help make good citizens of our young people and after thirty years of club work together, we feel we have accomplished much and intend to continue with our work.

The officers of the Oak Grove Club are: president, Mrs. Clifford Mawhorter; vice-president, Mrs. Clifford Mawhorter; parliamentarian, Mrs. O. F. Gorrell; Secretary, Mrs. H. A. Wilson; reporter, Mrs. Edgar Neighbors; song leader, Mrs. Elmer Mewes; game leader, Mrs. F. J. Yeater. The chairman are: Family Relations, Mrs. F. L. Yeater; Health, Mrs. E. L. Settler; Reading, Mrs. R. Van Sippy; Community Improvement, Mrs. Elmer Mewes; Policy, Mrs. A. A. Romig. The Project leaders are: Food and Nutrition, Mrs. Roy Petty and Mrs. H. L. Mewes; Clothing, Mrs. Edgar Neighbors and Mrs. J. C. Yeater; Home Management, Mrs. A. A. Romig and Mrs. Elsie Moon; Dramatics, Mrs. H. A. Wilson; Horticulture, Mrs. Charles Mawhorter and Mrs. W. H. Sperber; and Handicraft, Mrs. Marion Hall and Mrs. Clifford Mawhorter. Other members are: Mrs. Melvin Dexheimer, Mrs. W. C. Mewes, Mrs. Max Riecke, Mrs. Ernest Schlobohm, B.Mrs. Melvin Turner, and Mrs. Clayton Stephens.

First trans-Atlantic flight was attempted in 1910 by Walter Wellman, and a crew in a non-rigid airship.

Do not spray bindweed in hot, dry weather or just before or after a heavy frost.

In grasses the 24-D can be sprayed at the rate of 1-1/2 pounds of acid equivalent per acre. Even this rate will cause some injury to the crop, but the damage usually will not be serious.

In cases where respraying is necessary, best results are gotten where only one spray per year is applied. However, it is possible to spray in the spring and again in the fall but best results are usually gotten by waiting until the following spring for the second spray.

Experimental work has shown that the most satisfactory time to spray is in the bud or early bloom and when there is plenty of moisture in the soil. The reasoning that this is a time when the plant has the largest leaf area and is storing the most food in its roots. The 24-D sprayed upon the leaf will get into the circulatory system and be carried through the plant to the roots. It is under these conditions that the highest percent root kill can be gotten. After using 24-D, you will notice that the tops of the plants are readily deadened, but only about 90 per cent of the roots are usually killed.

Do not spray bindweed in hot, dry weather or just before or after a heavy frost.

After using 24-D, you will notice that the tops of the plants are readily deadened, but only about 90 per cent of the roots are usually killed.

Do not spray bindweed in hot, dry weather or just before or after a heavy frost.

In grasses the 24-D can be sprayed at the rate of 1-1/2 pounds of acid equivalent per acre. Even this rate will cause some injury to the crop, but the damage usually will not be serious.

In cases where respraying is necessary, best results are gotten where only one spray per year is applied. However, it is possible to spray in the spring and again in the fall but best results are usually gotten by waiting until the following spring for the second spray.

Experimental work has shown that the most satisfactory time to spray is in the bud or early bloom and when there is plenty of moisture in the soil. The reasoning that this is a time when the plant has the largest leaf area and is storing the most food in its roots. The 24-D sprayed upon the leaf will get into the circulatory system and be carried through the plant to the roots. It is under these conditions that the highest percent root kill can be gotten. After using 24-D, you will notice that the tops of the plants are readily deadened, but only about 90 per cent of the roots are usually killed.

Do not spray bindweed in hot, dry weather or just before or after a heavy frost.

## Our Boarding House with... Major Hoople

## Reserves Down, Need More Corn

It's time our nation faced squarely the situation that confronts us. We have been consuming more than we are producing, eating out of our reserves. This is a recent statement made by under secretary of agriculture Clarence J. McCormick.

We have all been warned that our so-called "surplus stocks" are either gone or fast going — too fast for comfort. Our reserve stocks of feed grains have dwindled below the safe level, and will fall even lower this year even if we meet our present production goals," report James A. Harvey, chairman of the Pettis County PMA committee.

Pettis county farmers have been asked to do their share in meeting the production goals by planting an increased acreage of corn. We have been most fortunate during the past week in that we have received rains which are helping considerably in the preparation of seed beds for corn and even for plowing more ground which might have become too hard to work.

"This is our challenge," states Harvey. "It's up to every farmer to use each acre wisely to produce the most feed per acre — whether in the form of grain, hay or pasture."

## Red Plan Tree Wall

SAN FRANCISCO (P) — The Chinese Communists boast that they are erecting a "modern Great Wall" in Manchuria—a vast shelter belt of trees intended to alter the climate of a windswept region of arid dunes.

The Peiping radio says that the shelter belt is to be 663 miles long, extending from Heilungkiang Province down to Liaoting peninsula and Shanhaikwan, southeastern end of the actual Great Wall of ancient China.

Width will range up to 186 miles the Reds say.

## See Binder Twine, Wire Supplies OK

"We have another report on supplies of some materials farmers will be needing this year," states James A. Harvey, chairman of the Pettis County PMA committee.

The Production and Marketing Administration, an agency of the U. S. Department of Agriculture, says we can count on plenty of binder twine this year. It looks now as though supplies will be ample for all needs.

And, as Harvey reported last week, there is expected to be an adequate supply of baling wire for this year's hay crops since production of it is at a high level.

PMA's report on fencing supplies indicates that barbed wire will be easier to get than it was last year. More of it is being manufactured, and there will be slightly more woven wire fencing available this year, too.

This is the over-all picture according to the department. However, Harvey points out that spot shortages may develop in the future because of transportation bottlenecks and peak buying periods.

## No Questions Asked

NEW YORK (P) — Any student enrolled at Columbia University, who is in need of money, can walk into the dean's office in the School of Engineering, ask for it and get it without question as to use or even signature.

This unusual loan fund was set up as a memorial to Jay L. White, who met accidental death shortly after his graduation in 1948. His fellow classmates contributed an initial gift of \$106. Additions to the fund by White's parents and others have brought the total to approximately \$400.

In operation since October, 1949, the fund hasn't lost a penny.

By Hershberger

"Frankly I don't think the public likes your speech, Mr. Kuku."

## Farmers Should Locate Seed Oats

Farmers are always looking out for improved seed. One of the most common requests that comes to the Extension Office about February 15 is where to locate the best possible seed oats.

This occurred in 1952 as usual. The Mo 205 oat has proven much superior to any other oat. However, inferior oats had to be used, as Mo 205 was sold by the growers months before February 15.

This oat is not only proving excellent in Missouri but in other states. In fact, an out-of-state seed company has fieldmen in Missouri contracting to buy certified Mo 205 oats at a price at least 3 times the price of feeding oats.

The point we are trying to get to you farmers is this. If you want this oat to seed next spring—don't wait until next spring to get it located and contracted for. Better buy it now even if you pay the price this company is paying for the seed. If you wait to buy next spring—even if you can find it—you likely will pay at least a third more than the price you can buy it at this summer.

Some Pettis County farmers will perhaps have some of this seed for sale. Perhaps they will prefer to sell to you rather than to out-of-county or out-of-state buyers—if they can sell to you at the time they can sell elsewhere.

The County Extension agent suggests you find out who is producing this seed and see them.

'Coup' Club Formed  
BANGKOK (Thailand) (P) — Thailand, land of coups and assassinations, now has a "Coup d'Etat Association" composed of those who took part in the coups of November, 1947, and November, 1951.

Members, who are officers and enlisted men of the three fighting services, have pledged themselves to further social progress and welfare of the country.

## Forgery Easy in U. S.

BELFAST, Northern Ireland (P) — Forgery is easier in the U. S. than in Britain, says Dr. Cecil L. Wilson, of Queen's University, Belfast.

Dr. Wilson, an expert on forgery, recently visited the FBI in Washington, where he was shown checks worth millions of dollars—all forged.

"In the United States," said Dr. Wilson, "people are so anxious to do business and salesmanship is of such a high-pressure nature that a check will be accepted almost from anyone. In Britain, a check is more difficult to cash, hence forgery is much less common."

# Nurse Kills Niece With Poison Pop

WETUMPKA, Ala. (P)—A plain, middle-aged hospital head nurse coolly confessed last night to killing her little niece with an arsenic-spiked soda pop.

The 42-year-old nurse, Mrs. Earle Dennison, denied, however, that she poisoned another niece whose body, exhumed after two years, showed arsenic traces.

Sheriff Lester Holley said Mrs. Dennison confessed in writing yesterday to the death three weeks ago of her 2-year-old niece by marriage, Shirley Diann Weldon.

Mrs. Dennison even watched the autopsy on the child in which the doctors found the arsenic traces, Holley reported.

"When I went to arrest her last Thursday," Holley continued, "she was in bed. While she was dressing she took something that knocked her out. I took her to the hospital and they fixed her up." The hospital said it was an overdose of sleeping pills.

Mrs. Dennison was charged with murder on a warrant sworn out by the parents of both children, Mr. and Mrs. O. C. Weldon.

The sheriff added these details:

The same day Mrs. Weldon gave birth to Shirley Diann, Polly Ann came down with convulsions a few moments after eating an ice cream cone given her by Mrs. Dennison. Mrs. Dennison admitted giving the child the cone but denied it was poisoned.

Polly Ann died in the hospital at which Mrs. Dennison was head nurse and was attended by her aunt in her off-hours.

The Weldons became suspicious after the second child was seized with convulsions immediately after eating something given her by Mrs. Dennison. They asked for the autopsy. After the arsenic traces were found they swore out a warrant.

Holley said that during the four hour questioning yesterday Mrs. Dennison was just as "cool as anyone could be."

Holley said the body of Mrs. Dennison's late husband, brother to Mrs. Weldon, had been exhumed but no poison was found.

**Mrs. Lincoln Was Only Girl Abe Ever Loved**

CHICAGO (P)—The familiar tragic love story of Abe Lincoln and Ann Rutledge once was indignantly described as a myth by Mary Todd Lincoln.

In a letter written to a Supreme Court justice and made public yesterday, the Civil War President's widow asserted Lincoln "always assured me he had cared for no one but myself."

Willard L. King, a Chicago lawyer and historian, said he came across the letter in his research for a biography of David Davis of Bloomington, Ill., an Illinois circuit judge whom Lincoln appointed to the U. S. Supreme Court.

Davis was administrator of Lincoln's estate. King said he found the letter in papers of Davis' great-grandson, David Davis IV.

Some historians have said Ann Rutledge and Lincoln were engaged to be married when both lived in New Salem, Ill., but that she died of fever before they could be wed. These biographers say Lincoln never recovered from shock and grief.

But Mrs. Lincoln wrote:

"My husband x x x always assured me he had cared for no one but myself. x x x I shall always remain firm in my conviction that ii iiiii iiiiii iiiii

Ann Rutledge is a myth.

"Nor did his x x x joyous laugh lead me to suppose his heart was in any unfortunate woman's grave but in the proper place with his loved wife and children."

**Plan Housing Project To Cost \$20 Millions**

KANSAS CITY (P)—Construction of a \$20,000,000 housing project to accommodate 2,250 families on the southeastern outskirts of Kansas City is being proposed by a New York firm, Praver & Son.

The builder's local representative, Enos Axtell, said the project could be completed within 18 months of final approval by Jackson County authorities on the 611-acre tract.

**Scaffold Fall Fatal**

KANSAS CITY, (P)—Injuries which 32-year-old Thomas Yandel suffered in a six-story fall May 7 caused his death yesterday. He was at work for a waterproofing company in Kansas City when a scaffold collapsed under him. His home was in Marshalltown, Iowa.

**Seven Advancements**

Seven vice presidents of the United States have succeeded to the office of President: John Tyler, Millard Fillmore, Andrew Johnson, Chester Arthur, Theodore Roosevelt, Calvin Coolidge, and Harry S. Truman.

**Commies Close 1 of 5 Border Crossings Today**

FRANKFURT, Germany (P)—A sudden Communist order today closed one of five border crossing points for German passenger trains linking the Soviet zone with West Germany.

Without explanation, the East German government shut off passenger traffic on the feeder line between Gutenberg in Soviet-occupied Thuringia, and Hof, frontier communications center in the American zone state of Bavaria.

Today's Red order was the first to cut down interzonal rail communications since the Berlin blockade ended in May, 1949.

## Political Roundup-- Free-for-All Democrat Race; Ike Narrows Taft GOP Lead

**By The Associated Press**

A no-compromise stand by President Truman on civil rights has put a new head of steam behind the free-for-all race for the Democratic presidential nomination.

And a week-end sweep of Oregon's 18 delegates to the Republican National Convention by Gen. Dwight D. Eisenhower narrowed the GOP race between the general and Sen. Robert A. Taft of Ohio.

This week's delegate harvest gets under way tomorrow in Montana, where the Democrats and the Republicans both hold state conventions. During the week, 105 delegates are to be picked in six states scattered throughout the nation.

The Democrats will name 70 representatives to their national convention, and the Republicans 35.

There are no state primaries this week. All delegates in both parties will be chosen by state party conclaves. The Democrats will pick up 12 delegates in Montana tomorrow, 32 Thursday in

## Raiders Direct UN Artillery To Hiding Reds

SEOUL, Korea (P)—United Nations raiders fought into heavily fortified Communist bunkers Sunday, then directed U.N. artillery fire onto fleeing Reds on the Western Korean Front.

Allied troops used the sturdy Red underground shelters as protection from the rain of high explosives picking off the Communist troops in the open.

Filipino troops on the Central Front, using grenades and bayonets, killed or wounded every one of 40 Chinese defending a hill position west of Chorwon.

All Allied raiding parties returned to U.N. lines, a U.S. Eighth Army staff officer said.

He reported patrol skirmishes all along the front Sunday were "heavier and longer than usual." One fight on the East-Central Front lasted two hours and 15 minutes.

Fifth Air Force pilots reported they destroyed 117 Red supply vehicles despite the handicap of low clouds.

Vice Adm. Joseph J. Clark will assume command of the U.S. Seventh Fleet Tuesday. He replaces Vice Adm. Robert P. Briscoe, who will take over from Vice Adm. C. Turner Joy as commander of naval forces in the Far East. Joy is returning to the U.S. to become superintendent of the Naval Academy.

Maj. Gen. Glenn O. Barcus has arrived in Tokyo on his way to Korea to take command of the Fifth Air Force. Barcus will replace Lt. Gen. Frank F. Everest, who is being transferred to the post last held by Barcus as deputy commanding general of the Tactical Air Command, Langley Field, Va.

**Sigma Delta Chi Awards to Newsmen**

CHICAGO, — Sigma Delta Chi, the nation's largest fraternity of newsmen, will present awards for distinguished service to American journalism at its annual awards banquet tonight.

The fraternity also will honor three journalists with its highest recognition, election as Sigma Delta Chi Fellows. They are Irving S. Dillard, editorial page editor of the St. Louis Post-Dispatch; Edward R. Murrow, radio news analyst for the Columbia Broadcasting system and Dr. Alberto Gainza Paz, until recently editor and publisher of Argentina's La Prensa.

The distinguished service bronze medallions for excellence in the field of journalism during 1951 will go to 11 individuals, a newspaper, radio stations and magazine.

The award winners include: Radio reporting, Jim Monroe, KCMO, Kansas City; editorial writing, Robert M. White II, Mexico (Mo) Ledger; and radio news-writing, William E. Griffith Jr., KMBC, Kansas City.

**How to have a winning TELEPHONE PERSONALITY**

by EMILY POST

We're often judged by the way we use telephone service. Good telephone technique and good telephone manners are important to a winning personality . . . and help you get the most from your telephone service.

One of the most aggravating experiences a person can have is to run to a ringing telephone, only to find that no one is there. But just how long should one let a phone ring before giving up?

At least a minute, is the experts' answer. After all, the person you're calling may be in the yard or away from the telephone. And the figures show that an estimated 350,000 calls a day are lost by Southwestern Bell customers who hang up too soon. A call worth making is certainly worth waiting a minute for.

In today's busy life, at home or in the office, it's only natural to leave the telephone as quickly as possible. Is there any special reason why you should replace the receiver carefully?

There certainly is! Your telephone is just one continuous "busy signal" if your receiver is not securely in place. You can't receive any calls, and if you are on a party line, neither can your party-line neighbors. It's a good idea to hang up carefully, and to check the telephone occasionally if there are small children in your home.

A great many questions about telephone manners center around the party line, and there seems to be some question as to the best way to use it. For example, should one space calls, or make them chain-style?

Spacing your calls works out best for all concerned. For one thing, others can't call you if you hold the line for a long time. Spacing your calls gives others a chance to call you—and also gives your party-line neighbors a chance to use the line. That results in better service for everyone.

## Man Free Under Murder Charge; Held 7 Months

CHICAGO (P)—A man who has been in jail seven months awaiting trial on a murder charge was freed yesterday after having confessed.

"I've prayed every night," said Grant Smith, 25-year-old Negro, "and my prayers have been answered."

Then he whooped, threw up his arms and danced for joy.

"I knew the Lord would not let an innocent man suffer," he shouted. "Even when those two men identified me, I knew the police would try to help."

Detectives William Fredrickson and James Dronney, who doubted Smith's guilt in the robbery slaying of Mrs. Helen Benson in South Side apartment last Oct. 13, brought good news for Smith.

It was a statement by Theodius Hester, 25, admitting the crime and naming two others as participants—Arthur Murphy, 27, and Percy King, 24. Lt. John Golden said King, seized for questioning in Los Angeles, and Murphy, picked up in Chicago, deny Hester's statement.

Hester, King and Murphy also are Negroes.

Mrs. Benson's husband Eugene identified Smith as the gunman who shot his wife, but the apartment hotel clerk was less certain and authorities said a lie detector cast doubt on Smith's guilt.

Assistant State's Atty. John Long said he would leave for California today to investigate the case and if Smith is cleared the charge against him will be dismissed.

## Ghost-Like Vessel Found Running Wide Open, None Aboard

SEATTLE (P)—A ghost-like fishing vessel—its load of fish partially decomposed and a cold cup of coffee in its cabin—was found by the Coast Guard yesterday running in circles about three miles off the Washington Coast. The engine was wide open, but no one was aboard.

The Coast Guard identified the vessel as the 37-ft Terrine. The owner of the craft, Richard H. Dill, of Port Angeles was presumed to have fallen overboard and drowned.

## Hal Boyle's Column-- Ulcers, He Finds, Are What A Man Makes Them for Self

**By HAL BOYLE**

NEW YORK (P)—Ulcers are what you make them.

The ulcer used to be the Horatio Alger disease. A man started off life poor but healthy, worked hard and honestly, and ended up wealthy—and ulcer-ridden.

An ulcer became a badge of success, particularly in the movie, radio and advertising fields, although industrial leaders were prone to catch them, too. The big bag was "even my ulcers are getting ulcers."

But today the ulcer no longer is an internal medal of honor in the struggle to get ahead. Somehow the word got around the ulcers were the product of tension. That immediately made the ulcer the property of the common man. For who in these times doesn't brag about the tension he is under?

Not to have an ulcer now is a kind of rebuke of your way of life, an implication you have been cheating by failing to do your fair share of the general worrying. Even housewives, smarting under the criticism they have a soft touch, are developing more ulcers. Either that or they are just tired of hearing husbands complain about their ulcers.

Such is the prestige of the ulcer in the business world that a friend of mine, stricken by sudden abdominal pains, went bravely and proudly to the hospital for an emergency operation. When he emerged from the anesthetic he learned to his horror that all he had undergone was an appendectomy.

"I was sure it was an ulcer," he said, shame-facedly, and pleaded: "Please don't let the word get around. They'll kid me to death at the office. Nobody but children get appendicitis anymore."

## Saline County Flood Loss at \$403,500

MARSHALL, Mo., — The recent flood on the Missouri river caused crop losses of about \$403,500 in Saline County, Missouri. This estimate has been made by the county mobilization committee and reported to the Production and Marketing Administration office in Columbia. The loss included 3,000 acres of wheat, 700 acres of oats, 450 acres of new alfalfa and 2,500 acres of other hay and pasture. No corn had been planted.

**DOC BOB YOUR CLEANER SEZ: PURE SUGAR CAUSES TROUBLESOME STAIN!**

Have you ever received a garment back from the cleaners with a stain on it? You're certain it wasn't there when you sent it for Dry Cleaning, and you wonder, "Is my cleaner in business to take spots out of my clothes or put spots on them." This has happened to many of us. Stains that are invisible when we send our clothes to be cleaned, and they appear as brown spots after cleaning, have cost cleaners countless claims and loss of customer confidence and good will. This has been a baffling problem for many years, and the National Institute of Cleaning and Dyeing has spent much time and money studying it from a scientific angle. See next issue for details.
